PROFESSIONAL SUMMARY

I'm a BI Analyst with three years of experience building dashboards and reports that help businesses understand their data better. I enjoy working with SQL and Python to solve analytical problems, and I'm comfortable presenting findings to non-technical stakeholders. I'm looking to deepen my expertise in data visualization and cloud-based analytics platforms while taking on more strategic analytical projects.

TECHNICAL SKILLS

Data Visualization: Tableau, Power BI, Looker

Databases: SQL Server, PostgreSQL, MySQL

Programming: Python, R, VBA

Tools and Platforms: Excel, Git, Jupyter Notebooks, Google Analytics

Data Warehousing: Basic Snowflake, dimensional modeling

Reporting: Crystal Reports, SSRS

Other: Data cleaning, ETL processes, statistical analysis

WORK EXPERIENCE

BI Analyst

DataFlow Solutions Ltd

www.dataflowsolutions.co.uk

Birmingham, United Kingdom

June 2022 - Present

Developed and maintained 15+ interactive Tableau dashboards for executive leadership tracking KPIs across sales, marketing, and operations departments, resulting in 20% faster decision-making cycles.

Created automated SQL queries to extract and transform data from multiple sources including Salesforce and Google Analytics, reducing manual reporting time by approximately 8 hours per week.

Collaborated with product and finance teams to identify data quality issues and implement validation rules that improved reporting accuracy by 15%.

Documented data lineage and ETL processes for six major reports, enabling other team members to troubleshoot issues independently and reducing support requests.

Senior Business Analyst

Insight Analytics Group

www.insightanalyticsgroup.io

Birmingham, United Kingdom

January 2021 - May 2022

Built Python scripts to automate data processing workflows for customer behavior analysis, processing approximately 2 million records weekly with 99.2% accuracy.

Presented weekly insights to C-level executives using Looker visualizations, translating complex datasets into actionable business recommendations that informed strategic decisions.

Trained four junior analysts on Power BI best practices and SQL fundamentals through structured mentoring sessions and documentation.

Supported the migration of legacy reports from Crystal Reports to Power BI, ensuring zero downtime and data consistency across 12 critical reports.

Data Analyst

Phoenix Business Intelligence

www.phoenixbi.net

Coventry, United Kingdom

September 2019 - December 2020

Analysed website traffic patterns using Google Analytics and custom SQL reports, identifying user journey bottlenecks and recommending optimizations that increased conversion rates by 12%.

Designed and implemented a data warehouse schema for customer transaction data using dimensional modeling principles, supporting real-time reporting across five business units.

Conducted statistical analysis using Python and R to validate marketing campaign effectiveness and provided detailed reports with visualizations to stakeholders.

Assisted with VBA macro development in Excel to automate monthly financial reconciliation, reducing processing time from 2 days to 4 hours.

EDUCATION

MSc Business Analytics

Aston University, Birmingham

Graduated: September 2019

BSc Mathematics

University of Warwick, Coventry

Graduated: June 2017

GITHUB REPOSITORIES

github.com/jbradleyhart/sales-dashboard-etl

Python-based ETL pipeline for extracting and transforming Salesforce data for Tableau dashboards. Includes scheduling via APScheduler and error logging.

github.com/jbradleyhart/customer-churn-analysis

Predictive analytics project using Python and scikit-learn to identify at-risk customers. Contains data cleaning, feature engineering, and model evaluation.

github.com/jbradleyhart/power-bi-report-templates

Collection of Power DAX formulas and templates for common BI scenarios including YoY comparisons, running totals, and date hierarchies.

github.com/jbradleyhart/sql-utility-scripts

Library of reusable SQL queries for data profiling, duplicate detection, and performance optimization across SQL Server and PostgreSQL databases.

CERTIFICATIONS AND TRAINING

Tableau Desktop Specialist - Completed March 2022

Microsoft SQL Server 2019 Fundamentals - Completed July 2021

Google Analytics Individual Qualification - Completed November 2020
