Location: Liverpool, United Kingdom

PROFESSIONAL SUMMARY

Results-driven Data Scientist with 3 years of experience developing machine learning solutions and statistical models to drive business insights. Proven ability to work with large datasets, build predictive models, and communicate findings to both technical and non-technical stakeholders. Strong background in Python, SQL, and data visualization tools with a track record of delivering impactful analytical projects in fast-paced environments.

WORK EXPERIENCE

Data Scientist

CloudPeak Technologies Ltd

Liverpool, United Kingdom

www.cloudpeaktech.io

January 2022 - Present

Developed and deployed 5 machine learning models using Python and scikit-learn, resulting in 23% improvement in customer churn prediction accuracy

Built automated ETL pipelines using SQL and Apache Spark to process 2TB+ of daily transaction data, reducing data preparation time by 40%

Created interactive dashboards in Tableau and Power BI for executive stakeholders, enabling data-driven decision-making across 3 business units

Conducted exploratory data analysis on customer behaviour datasets and presented recommendations that led to a 15% increase in retention rates

Data Scientist

Barclays Bank UK

Liverpool, United Kingdom

www.barclays.com

October 2020 - December 2021

Engineered feature engineering pipelines to improve model performance on credit risk assessment models, increasing AUC score from 0.78 to 0.84

Collaborated with cross-functional teams of engineers and analysts to implement real-time anomaly detection system for fraud prevention

Documented and maintained reproducible machine learning workflows using Git version control and Jupyter notebooks

Applied statistical hypothesis testing and A/B testing methodology to validate business assumptions across marketing campaigns

Data Analyst

Synapse Data Ltd

Manchester, United Kingdom

www.synapsedata.co

June 2020 - September 2020

Analyzed user engagement metrics from web and mobile platforms using Python pandas and NumPy, identifying key conversion bottlenecks

Performed regression analysis and time series forecasting to predict quarterly revenue trends with 88% accuracy

Created automated reporting systems using Python scripts to distribute weekly KPI summaries to 20+ stakeholders

Supported senior data scientists in feature selection and model validation for customer segmentation project

EDUCATION

Bachelor of Science in Mathematics with Statistics

University of Manchester

Manchester, United Kingdom

Graduated: July 2020

Grade: Upper Second Class Honours (2:1)

TECHNICAL SKILLS

Programming Languages: Python, SQL, R

Machine Learning: scikit-learn, TensorFlow, XGBoost, Logistic Regression, Random Forests, Neural Networks

Data Manipulation: Pandas, NumPy, PySpark

Data Visualization: Tableau, Power BI, Matplotlib, Seaborn

Databases: PostgreSQL, MySQL, MongoDB

Tools and Platforms: Jupyter Notebook, Git, Google Cloud Platform, Anaconda

Statistical Methods: Hypothesis Testing, A/B Testing, Time Series Forecasting, Regression Analysis

CERTIFICATIONS

Google Cloud Professional Data Engineer Certificate - In Progress

Coursera Machine Learning Specialization - Completed December 2021
