PROFESSIONAL SUMMARY

Data-driven analyst with 14 years of progressive experience transforming complex datasets into actionable business insights. Proven expertise in building scalable analytics solutions, leading cross-functional teams, and implementing advanced statistical methodologies. Skilled at translating business requirements into technical specifications while mentoring junior analysts and establishing best practices. Currently based in Amsterdam with a strong track record of delivering high-impact analytics projects across finance, retail, and technology sectors.

WORK EXPERIENCE

Staff Data Analyst

Booking.com

Amsterdam, Netherlands

<https://www.booking.com>

March 2021 - Present

Designed and deployed enterprise-level analytics frameworks supporting 2000+ stakeholders across product, marketing, and finance divisions.

Led development of real-time data pipeline infrastructure reducing query latency by 65% and enabling faster decision-making across business units.

Mentored team of 8 junior and mid-level analysts, establishing coding standards and conducting weekly knowledge-sharing sessions on advanced SQL optimization techniques.

Managed \$1.2M analytics budget, overseeing procurement of tools and infrastructure while maintaining cost efficiency through cloud resource optimization.

Senior Data Analyst

Synapse Data Ltd (Previously known as DataCore Analytics BV)

Amsterdam, Netherlands

synapsedataltd.io

June 2017 - February 2021

Built predictive models for customer churn that improved retention metrics by 23% and generated estimated revenue impact of EUR 2.8M annually.

Established automated reporting suite covering 150+ KPIs across five business departments using Python, R, and Tableau.

Collaborated with machine learning engineers to operationalize advanced algorithms and integrate them into production environments.

Directed transition from legacy on-premise data warehouse to cloud-based infrastructure, reducing infrastructure costs by 40% while improving query performance.

Data Analyst

ING Netherlands

Amsterdam, Netherlands

<https://www.ing.nl>

September 2010 - May 2017

Developed comprehensive financial dashboards and reporting systems for risk management and regulatory compliance teams.

Conducted exploratory data analysis on transaction datasets containing 50+ million records to identify fraud patterns and anomalies.

Authored documentation and standard operating procedures for analytics workflows, improving team productivity by 35%.

Supported data governance initiatives and implemented quality assurance processes ensuring 99.7% data accuracy across reporting systems.

EDUCATION

MSc Business Analytics

University of Amsterdam

Amsterdam, Netherlands

Graduated: June 2010

BSc Statistics and Business Administration

Erasmus University Rotterdam

Rotterdam, Netherlands

Graduated: June 2008

TECHNICAL SKILLS

Data Analysis and Visualization: Tableau, Power BI, Looker, Matplotlib, Seaborn

Programming Languages: Python, R, SQL, Scala, Bash

Database Technologies: PostgreSQL, MySQL, BigQuery, Snowflake, Redshift, MongoDB

Data Engineering: Apache Spark, Kafka, Airflow, dbt, ETL pipeline development

Statistical Methods: Regression analysis, A/B testing, time series forecasting, causal inference, hypothesis testing

Cloud Platforms: Google Cloud Platform, Amazon Web Services, Microsoft Azure

Tools and Platforms: Git, Jupyter Notebook, RStudio, Jira, Confluence, Linux

GITHUB REPOSITORIES

[marijnvdmeer/advanced-churn-prediction](#)

Repository containing ensemble machine learning models for customer churn prediction using gradient boosting and neural networks with extensive hyperparameter tuning.

[marijnvdmeer/sql-query-optimization-framework](#)

Collection of scripts and best practices for optimizing complex SQL queries across distributed databases, including execution plan analysis and indexing strategies.

[marijnvdmeer/tableau-dashboard-templates](#)

Reusable Tableau dashboard templates for common analytical use cases including KPI monitoring, financial reporting, and customer segmentation.

[marijnvdmeer/python-data-pipeline](#)

Production-ready Python package for building scalable ETL pipelines with error handling, logging, and data validation modules.
