PROFESSIONAL SUMMARY

Results-driven and highly motivated Frontend Engineer with proven track record of leveraging cutting-edge technologies to spearhead mission-critical initiatives. Expert at championing cross-functional collaboration to drive actionable insights and synergistically deliver innovative solutions. Passionate about data-driven decision making and passionate about delivering value through organisational objectives. Demonstrated ability to architect scalable user interfaces whilst maintaining dynamic problem-solving capabilities.

WORK EXPERIENCE

Staff Frontend Engineer

TechVision Solutions

teckvision.io

Barcelona, Spain

January 2021 - December 2023

- Led the architectural redesign of the customer dashboard, improving page load times by 40% through advanced code splitting and lazy loading implementation
- Mentored team of 5 junior developers in React best practices and modern JavaScript patterns, establishing coding standards across the organization
- Spearheaded migration from legacy jQuery codebase to Vue 3, resulting in 35% reduction in bundle size and improved application maintainability
- Implemented comprehensive component library using Storybook, reducing design-to-development handoff time by 50%

Senior Frontend Engineer

Digital Innovations Ltd

www.digitalinnovations.co.uk

Madrid, Spain

March 2019 - March 2021

- Developed and maintained responsive web applications serving 2 million monthly active users using React and TypeScript
- Optimized critical rendering path and implemented performance monitoring using Lighthouse CI, achieving 92+ Lighthouse scores
- Collaborated with UX/UI team to implement accessibility standards (WCAG 2.1 AA compliance) across all customer-facing interfaces
- Established automated testing framework using Jest and React Testing Library, increasing code coverage from 45% to 82%

Frontend Developer

StartupHub Barcelona

startuphub.io

Barcelona, Spain

June 2016 - February 2019

- Built responsive web interfaces for SaaS platform using HTML5, CSS3, and vanilla JavaScript, supporting 500+ enterprise clients
- Implemented real-time data visualization dashboard using D3.js and WebSocket connections for live market data updates
- Optimized frontend performance resulting in 45% faster initial page load, enhancing user retention metrics by 28%
- Participated in Agile sprint cycles and code reviews, maintaining high code quality standards and best practices
