PROFESSIONAL SUMMARY

Experienced backend engineer with 3 years of progressive software development experience building scalable REST APIs and microservices. Proficient in Python and Java with a strong foundation in relational databases and cloud platforms. Seeking to advance technical expertise in a challenging mid-level position where I can contribute to robust backend systems while continuing to expand my engineering skillset.

WORK EXPERIENCE

Senior Backend Developer

TechVenture Solutions Ltd

techventure.io

London, United Kingdom

June 2023 - Present

Designed and implemented 5 new REST API endpoints using Python Flask framework to support mobile application requirements, reducing client-side processing time by 35%

Migrated legacy monolithic application to microservices architecture using Docker containers, enabling independent deployment cycles and improving team velocity

Optimized PostgreSQL queries across 12 critical database tables, reducing average query execution time from 800ms to 120ms and improving overall application performance

Mentored 2 junior developers on backend best practices, code review standards, and debugging techniques

Backend Software Engineer

Pinnacle Digital Services

pinnacle-digital.co.uk

Reading, United Kingdom

February 2022 - May 2023

Developed Java-based payment processing module handling 50,000+ daily transactions with 99.9% uptime guarantee

Implemented automated testing suite using JUnit and Mockito, achieving 78% code coverage and reducing production bugs by 40%

Collaborated with frontend team to design and document 8 API contracts using OpenAPI specification, ensuring seamless integration across services

Troubleshoot production issues and implemented fixes within SLA timeframes, maintaining customer satisfaction metrics above 95%

Junior Backend Developer

DataFlow Systems

dataflow-systems.net

Oxford, United Kingdom

August 2020 - January 2022

Built REST APIs using Node.js and Express framework to support internal business analytics platform used by 200+ employees

Implemented database schemas and migrations using Sequelize ORM, ensuring data integrity and supporting application scalability

Participated in daily stand-ups and sprint planning, delivering features on schedule with consistent code quality standards

Debugged and resolved 30+ production incidents, collaborating with DevOps team to implement monitoring solutions using CloudWatch

EDUCATION

University of Birmingham

Bachelor of Science in Computer Science

Graduated: June 2020

Grade: Upper Second Class Honours

SKILLS

Backend Languages: Python, Java, JavaScript, Node.js

Frameworks: Flask, Express.js, Spring Boot

Databases: PostgreSQL, MySQL, MongoDB

Tools and Platforms: Docker, AWS (EC2, S3, RDS), Git, JIRA

Testing: JUnit, Pytest, Mockito

Version Control: Git, GitHub Enterprise

Container Orchestration: Kubernetes, Docker Compose

Infrastructure as Code: Terraform, ArgoCD

API Design: REST, OpenAPI, GraphQL basics

Agile Methodologies: Scrum, Sprint-based development

CERTIFICATIONS

AWS Certified Cloud Practitioner

Issued: March 2022
