PROFESSIONAL SUMMARY

Results-driven Business Intelligence Analyst with 12 years of progressive experience delivering data-driven insights and strategic analytics solutions across financial services and retail sectors. Proven expertise in designing and implementing enterprise BI platforms, managing stakeholder relationships, and translating complex business requirements into actionable intelligence. Strong background in SQL optimization, data warehousing architecture, and executive reporting with a track record of improving operational efficiency through advanced analytics.

WORK EXPERIENCE

Senior BI Analyst

DataVault Solutions Ltd

London, United Kingdom

www.datavault-solutions.co

January 2021 - Present

Designed and deployed enterprise data warehouse supporting 150+ concurrent users across five business divisions, resulting in 35% improvement in query performance and reduced reporting cycle time from weekly to daily updates.

Led cross-functional team of four junior analysts in developing advanced Power BI dashboards and scorecards for C-suite executives, enabling data-driven decision-making on strategic initiatives worth GBP 40 million annually.

Architected ETL pipelines using SQL Server Integration Services to consolidate data from 20+ source systems including Salesforce, SAP, and custom APIs, ensuring 99.2% uptime and data accuracy across all business intelligence solutions.

Mentored and managed performance reviews for analytics team members, overseeing their professional development, technical certifications, and career progression within the organization.

BI Analyst

InsightCore Analytics

London, United Kingdom

www.insightcore.io

March 2016 - March 2021

Developed and maintained 50+ operational and financial reports using SQL and Tableau, serving 200+ internal business users with real-time metrics on sales performance, customer retention, and supply chain optimization.

Conducted data profiling and quality assessments across multiple data sources, identifying and remediating data integrity issues that resulted in correcting inaccurate KPIs affecting strategic planning.

Built automated reporting framework that eliminated 15 hours of manual weekly report consolidation, freeing up team capacity for higher-value analytics and business consulting projects.

Collaborated with IT and database administration teams to optimize SQL queries and implement indexing strategies that reduced average query execution time from 8 minutes to 45 seconds.

Business Intelligence Consultant

Apex Data Services

London, United Kingdom

www.apexdata.net

July 2012 - January 2021

Delivered end-to-end BI consulting engagements for 12 enterprise clients in retail, healthcare, and manufacturing sectors, assessing business requirements and recommending appropriate analytics platforms and methodologies.

Implemented data visualization solutions using QlikView and Tableau, creating interactive dashboards that improved business user adoption rates by 60% and enabled self-service analytics capabilities.

Trained 200+ business users on BI tools and best practices through workshops and documentation, ensuring successful system adoption and maximizing return on investment for analytics platforms.

Performed data modeling and designed star schemas and dimensional models for enterprise data marts, supporting complex analytical queries and reducing database storage requirements by 25%.

EDUCATION

Bachelor of Science in Computer Science

University of Manchester

Manchester, United Kingdom

Graduated: June 2012
