PROFESSIONAL SUMMARY

Highly experienced DevOps Engineer with 7 years of progressive expertise in cloud infrastructure, containerization, and CI/CD pipeline development. Proven track record of designing and implementing scalable solutions for enterprise-level applications across AWS and Kubernetes environments. Passionate about automation, infrastructure-as-code, and fostering collaboration between development and operations teams. Known for delivering robust solutions that improve deployment reliability and reduce operational overhead.

WORK EXPERIENCE

Senior DevOps Engineer

Synapse Data Ltd

Berlin, Germany

January 2023 - Present

<https://synapse-data.io>

Architected and deployed multi-region Kubernetes clusters supporting microservices architecture for data processing platform serving 200+ enterprise clients.

Implemented comprehensive Infrastructure-as-Code using Terraform and Ansible, reducing manual infrastructure provisioning time by 85 percent across 15 AWS accounts.

Designed and deployed dbt pipelines integrated with Apache Airflow for automated data transformation workflows, improving data processing efficiency by 60 percent.

Mentored team of 3 junior DevOps engineers and established best practices for container security, disaster recovery, and cost optimization initiatives.

Staff DevOps Engineer

SAP SE

Walldorf, Germany

August 2021 - December 2022

<https://www.sap.com>

Led cloud migration initiative for legacy on-premise systems to AWS, managing infrastructure decisions and team coordination across 12 engineers reporting directly.

Implemented GitHub Actions CI/CD pipelines for automated testing and deployment of microservices, reducing release cycle from 2 weeks to 2 days.

Developed comprehensive monitoring and alerting strategy using Prometheus and Grafana, achieving 99.99 percent uptime for production systems.

Designed automated disaster recovery procedures with RTO of 30 minutes and RPO of 5 minutes for critical business applications.

Junior DevOps Engineer

Zalando SE

Berlin, Germany

June 2017 - July 2021

<https://www.zalando.com>

Managed Kubernetes infrastructure supporting 50+ microservices with 300+ containers deployed across production and staging environments.

Implemented HuggingFace Transformers-based ML model deployment pipeline for customer recommendation engine, processing 100,000 requests daily with 99.9 percent reliability.

Automated infrastructure monitoring and alerting using ELK stack and CloudWatch, reducing incident response time by 75 percent.

Collaborated with DevSecOps team to implement container scanning and vulnerability management, eliminating 95 percent of critical security issues in production.

EDUCATION

Diplom in Informatik

Technical University of Berlin (Technische Universität Berlin)

Berlin, Germany

Graduated: July 2017

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, RDS, Lambda, CloudFormation), Google Cloud Platform, Azure

Container Orchestration: Kubernetes, Docker, Docker Compose, Helm

Infrastructure-as-Code: Terraform, CloudFormation, Ansible, Packer

CI/CD Tools: Jenkins, GitLab CI, GitHub Actions, ArgoCD

Monitoring and Logging: Prometheus, Grafana, ELK Stack, Datadog, CloudWatch

Databases: PostgreSQL, MySQL, MongoDB, Redis, DynamoDB

Programming Languages: Python, Bash, Go, YAML

Version Control: Git, GitHub, GitLab

DevOps Practices: Infrastructure automation, configuration management, containerization, secrets management, security scanning

CERTIFICATIONS

AWS Certified Solutions Architect - Professional

Kubernetes Administrator (CKA)

Terraform Associate
