PROFESSIONAL SUMMARY

Junior DevOps Engineer with 1 year of hands-on experience in cloud infrastructure and continuous integration/deployment pipelines. Passionate about automating deployment processes and improving system reliability. Recently completed a degree in Computer Science and eager to grow expertise in modern DevOps practices and cloud technologies. Strong foundation in Linux administration and basic scripting with clear motivation to develop advanced infrastructure skills.

WORK EXPERIENCE

DevOps Engineer

TechFlow Solutions, Barcelona, Spain

techflowsolutions.io

June 2023 - Present

Deployed and maintained Docker containers across development and staging environments using Docker Compose for multi-container orchestration

Managed AWS EC2 instances and RDS databases, monitoring performance metrics and handling basic infrastructure scaling tasks

Assisted in setting up CI/CD pipelines using Jenkins, collaborating with senior engineers to automate build and deployment processes

Troubleshoot deployment failures and collaborated with development teams to resolve infrastructure-related issues

Junior Cloud Operations Technician

CloudServe Europe, Barcelona, Spain

cloudserve.net

January 2023 - May 2023

Monitored application performance and server health using CloudWatch dashboards and configured basic alerts for critical metrics

Performed routine system maintenance including patching, security updates, and log management on Ubuntu Linux servers

Supported the deployment of microservices to AWS ECS cluster under supervision of senior DevOps team members

Documented infrastructure configurations and runbooks to improve team knowledge sharing and operational procedures

Cloud Support Specialist

DataCore Infrastructure, Barcelona, Spain

datacore.co

September 2022 - December 2022

Provided tier 1 technical support for cloud infrastructure issues and assisted customers with AWS service troubleshooting

Managed DNS records and basic networking configurations for client environments using Route 53

Created and maintained detailed incident documentation and contributed to post-incident review processes

Collaborated with infrastructure team to identify and escalate recurring technical issues requiring deeper investigation

EDUCATION

Degree in Computer Science

Universitat Autònoma de Barcelona, Barcelona, Spain

Graduated: May 2022

Relevant Coursework: Systems Administration, Network Fundamentals, Introduction to Cloud Computing, Linux Operating Systems

TECHNICAL SKILLS

Cloud Platforms: Amazon Web Services (AWS), EC2, RDS, S3, CloudWatch, Route 53

Containerization: Docker, Docker Compose

CI/CD Tools: Jenkins, GitLab CI

Version Control: Git, GitHub

Scripting Languages: Bash, Python (beginner level)

Operating Systems: Linux (Ubuntu, CentOS), Windows Server

Monitoring Tools: CloudWatch, basic Prometheus setup

Infrastructure as Code: Kubernetes, Terraform, ArgoCD

Databases: MySQL, PostgreSQL (basic)

Other: JIRA, Confluence, Agile methodologies

GITHUB REPOSITORIES

github.com/alexramonmoreno/docker-compose-lamp-stack - Docker Compose configuration for LAMP stack development environment with automated setup scripts

github.com/alexramonmoreno/aws-ec2-terraform-module - Reusable Terraform module for provisioning AWS EC2 instances with VPC configuration

github.com/alexramonmoreno/bash-deployment-scripts - Collection of Bash scripts for automating server configuration and application deployment tasks

github.com/alexramonmoreno/monitoring-setup-guide - Documentation and configuration files for setting up CloudWatch dashboards and basic monitoring infrastructure

CERTIFICATIONS

AWS Certified Cloud Practitioner (Expected: Q4 2024)

Linux Foundation Essentials (LFCE) - In Progress
