PROFESSIONAL SUMMARY

Results-driven Staff Engineer with 12 years of experience designing and implementing scalable systems across fintech and enterprise platforms. Proven track record of mentoring engineering teams, architecting microservices infrastructure, and delivering high-impact technical solutions. Strong expertise in distributed systems, cloud architecture, and DevOps practices. Currently seeking challenging opportunities in London to lead technical strategy and drive organisational growth.

WORK EXPERIENCE

Staff Engineer

TechVault Solutions

www.techvault.io

London, United Kingdom

March 2021 - Present

Led the architectural redesign of core payment processing system, reducing latency by 65 percent and supporting 10 million daily transactions with zero downtime deployments.

Mentored a team of 8 engineers across backend and infrastructure domains, establishing code review standards and technical onboarding frameworks that improved team velocity by 40 percent.

Designed and implemented comprehensive observability platform using Prometheus, Grafana, and ELK stack, enabling real-time monitoring across 500 plus microservices in production.

Established cross-functional technical working groups with product and security teams, resulting in successful implementation of zero-trust architecture across all customer-facing APIs.

Senior Software Engineer

DataStream Capital

www.datastream.co

London, United Kingdom

June 2017 - February 2021

Architected event-driven trading platform using Apache Kafka and Apache Flink, processing over 2 billion market data events daily with sub-millisecond latency requirements.

Took ownership of Kubernetes migration project, transitioning 200 plus containerised applications from manual Docker Swarm deployments to EKS, reducing infrastructure costs by 35 percent.

Developed comprehensive testing strategy including unit, integration, and performance testing frameworks, achieving 87 percent code coverage and reducing production incidents by 55 percent.

Collaborated with security team to implement secrets management, audit logging, and compliance monitoring systems meeting FCA regulatory requirements.

Software Engineer

Innovate Digital Ltd

www.innovatedigital.net

Manchester, United Kingdom

July 2012 - May 2017

Built scalable REST APIs in Java and Go serving millions of requests daily for e-commerce and SaaS platforms, implementing rate limiting and caching strategies.

Contributed to infrastructure-as-code initiatives using Terraform and CloudFormation, standardising deployment processes and reducing provisioning time from 2 weeks to 2 hours.

Participated in on-call rotation managing production systems, investigating critical incidents and implementing permanent fixes that reduced MTTR by 50 percent.

Mentored 3 junior developers through pair programming and code reviews, helping them progress to mid-level engineer positions within 18 months.

EDUCATION

MSc Computer Science

University of Manchester

Manchester, United Kingdom

Graduated: September 2012

BSc Computer Science with Industrial Placement

University of Bristol

Bristol, United Kingdom

Graduated: June 2011

TECHNICAL SKILLS

Programming Languages: Java, Go, Python, JavaScript, SQL

Cloud Platforms: AWS (EC2, ECS, EKS, RDS, S3, Lambda), Google Cloud Platform, Azure

Containerisation and Orchestration: Docker, Kubernetes, Helm

Databases: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch

Message Brokers: Apache Kafka, RabbitMQ, AWS SQS

Infrastructure and DevOps: Terraform, CloudFormation, Jenkins, GitLab CI/CD, Ansible

Monitoring and Observability: Prometheus, Grafana, ELK Stack, Datadog

Methodologies: Agile, Scrum, Test-Driven Development, Microservices Architecture
