PROFESSIONAL SUMMARY

Results-driven Principal Engineer with 7 years of progressive expertise in architecting mission-critical cloud infrastructure and spearheading cross-functional collaboration across distributed teams. Highly motivated technical leader with proven track record of leveraging cutting-edge technologies to drive actionable insights and deliver synergistic solutions that align with organisational objectives. Champion of innovative data-driven decision making and passionate about delivering value through dynamic architectural patterns. Demonstrated ability to architect scalable systems and mentor engineering teams to achieve breakthrough performance improvements.

WORK EXPERIENCE

Principal Engineer

Danske Bank A/S, www.danskebank.dk

Copenhagen, Denmark

March 2022 - Present

- Led architectural redesign of microservices infrastructure handling 2 billion daily transactions, reducing latency by 45% and enabling 99.99% uptime across all mission-critical services
- Spearheaded adoption of LangChain for real-time data pipeline processing, achieving 60% improvement in query performance and creating competitive advantage in market analytics
- Mentored team of 8 junior and mid-level engineers on cloud-native patterns, establishing best practices and establishing collaborative culture across distributed Copenhagen and Aarhus offices
- Championed implementation of Kubernetes-based container orchestration platform, reducing infrastructure costs by 32% while improving deployment frequency to 50+ releases per day

Senior Software Engineer

TechVision Labs (Previously known as CloudCore Solutions ApS), www.techvisionlabs.io

Copenhagen, Denmark

January 2019 - February 2022

- Architected and deployed GitHub Actions CI/CD pipeline for 12 microservices supporting 500K active users, reducing deployment time from 2 hours to 12 minutes and eliminating manual testing bottlenecks
- Developed HuggingFace Transformers-based NLP infrastructure for real-time customer sentiment analysis, processing 50K documents daily and generating insights for executive decision-making
- Designed and implemented multi-region PostgreSQL replication strategy ensuring disaster recovery capabilities across Nordic data centres with RPO of 5 minutes
- Collaborated with product and data science teams to define API contracts and establish scalable event streaming architecture using Apache Kafka, handling 100K events per second

Software Engineer

Vertex Development Group, www.vertexdevgroup.net

Copenhagen, Denmark

June 2016 - December 2018

- Engineered dbt-based data transformation layer for analytics platform processing 500GB daily volume, enabling self-service BI tools and reducing report generation time from 4 hours to 15 minutes
- Built REST APIs in Python and Node.js serving internal and external clients, achieving 99.95% availability with comprehensive monitoring and alerting using Prometheus and Grafana
- Implemented automated testing framework increasing code coverage from 42% to 87%, resulting in 63% reduction in production incidents over 18-month period
- Contributed to migration of legacy monolithic application to event-driven architecture using Apache Kafka and Docker, enabling team to scale horizontally and support 3x traffic growth

EDUCATION

Master of Science in Computer Science

Technical University of Denmark (DTU), www.dtu.dk

Kongens Lyngby, Denmark

Graduated: June 2016

Bachelor of Science in Software Engineering

Aarhus University, www.au.dk

Aarhus, Denmark

Graduated: June 2014

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, Lambda, RDS, CloudFormation), Google Cloud Platform, Azure

Container Technologies: Docker, Kubernetes, Docker Compose, Helm

Programming Languages: Python, Java, Go, JavaScript, TypeScript, SQL

Databases: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, DynamoDB

Data Engineering: Apache Kafka, Apache Spark, dbt, Airflow, Apache NiFi

APIs and Integration: REST APIs, GraphQL, gRPC, Apache Avro, Protocol Buffers

DevOps and CI/CD: GitHub Actions, GitLab CI, Jenkins, Terraform, Ansible

Monitoring and Observability: Prometheus, Grafana, ELK Stack, DataDog, CloudWatch

Machine Learning: TensorFlow, PyTorch, HuggingFace Transformers, scikit-learn

Methodologies: Agile, Scrum, Test-Driven Development, Domain-Driven Design

CERTIFICATIONS

AWS Certified Solutions Architect - Professional, 2021

Kubernetes Application Developer (CKAD), 2020

AWS Certified Developer - Associate, 2019
