PROFESSIONAL SUMMARY

Results-driven Principal Engineer with 7 years of progressive experience spearheading cutting-edge technology initiatives across dynamic organisations. Highly motivated to champion cross-functional collaboration and leverage data-driven decision making to deliver actionable insights that directly impact organisational objectives. Proven track record of synergistically architecting mission-critical solutions whilst maintaining a passionate commitment to delivering value through innovative and proven methodologies.

WORK EXPERIENCE

Principal Engineer

Stratix Digital Solutions Ltd

stratixdigital.io

Bristol, United Kingdom

January 2022 - Present

Led the design and implementation of microservices architecture supporting 2 million+ daily transactions across multiple business units

Mentored team of 8 junior and mid-level engineers, establishing coding standards and technical best practices that reduced production incidents by 34%

Architected cloud migration strategy from on-premise infrastructure to AWS, achieving 40% cost reduction and improved system reliability to 99.97% uptime

Spearheaded evaluation and adoption of Kubernetes orchestration platform, reducing deployment time from 45 minutes to 8 minutes across all environments

Senior Software Engineer

CloudVault Technologies

cloudvault.net

London, United Kingdom

August 2020 - December 2021

Designed and deployed distributed systems handling 500GB+ daily data ingestion with sub-100ms latency requirements

Led cross-functional team of 5 engineers and data scientists to deliver real-time analytics platform used by 150+ enterprise clients

Implemented comprehensive monitoring and observability strategy using Prometheus and Grafana, reducing mean time to resolution by 52%

Optimised database query performance through indexing strategy and query restructuring, improving application response times by 60%

Senior Systems Engineer

BAE Systems

baesystems.com

Bristol, United Kingdom

March 2018 - January 2021

Managed infrastructure for secure government-grade applications supporting mission-critical operations across defence and security sectors

Designed high-availability disaster recovery solutions achieving RTO of 4 hours and RPO of 30 minutes for critical systems

Implemented infrastructure-as-code framework using Terraform and Ansible, reducing environment provisioning time from 6 days to 4 hours

Collaborated with security team to conduct vulnerability assessments and remediation, achieving ISO 27001 compliance certification

EDUCATION

MSc Computer Science

University of Manchester

Manchester, United Kingdom

2015 - 2017

BSc Computer Science with First Class Honours

University of Bristol

Bristol, United Kingdom

2011 - 2015

TECHNICAL SKILLS

Languages: Java, Python, Go, TypeScript, SQL, Bash

Cloud Platforms: AWS (EC2, S3, RDS, Lambda, VPC), Microsoft Azure, Google Cloud Platform

Container Technologies: Docker, Kubernetes, Docker Swarm

Infrastructure & DevOps: Terraform, Ansible, Jenkins, GitLab CI/CD, CloudFormation

Databases: PostgreSQL, MySQL, MongoDB, Redis, Apache Cassandra

Monitoring & Logging: Prometheus, Grafana, ELK Stack, Datadog

Architectural Patterns: Microservices, Event-Driven Architecture, CQRS, API Gateway

Version Control: Git, GitHub, GitLab

Methodologies: Agile, Scrum, Kanban, Infrastructure as Code
