PROFESSIONAL SUMMARY

Seasoned Principal Engineer with extensive expertise in cloud infrastructure and distributed systems architecture. Proven track record of designing and implementing large-scale solutions while mentoring engineering teams across multiple organizations. Passionate about emerging technologies and driving technical excellence in fast-paced environments. Currently based in Copenhagen with 12 years of progressive technical experience.

WORK EXPERIENCE

Principal Engineer

Zenith Data Systems

zenith-datasystems.io

London, United Kingdom

June 2022 - Present

Architected and delivered a microservices platform serving 50 million daily users across Europe and Asia, reducing infrastructure costs by 34 percent through optimized container orchestration

Led a team of 45 engineers across frontend, backend, and DevOps domains, implementing OKR-based planning and improving deployment frequency from monthly to daily releases

Established company-wide technical standards for API design, security, and performance monitoring, resulting in 28 percent reduction in production incidents

Managed strategic partnerships with AWS and Kubernetes ecosystem vendors, negotiating contracts worth 2.3 million euros annually

Senior Infrastructure Engineer

CloudVault Solutions

cloudvault-solutions.net

Copenhagen, Denmark

March 2020 - May 2022

Redesigned the entire CI/CD pipeline for 12 development teams, reducing build times from 45 minutes to 8 minutes through parallelization and caching strategies

Implemented Kubernetes cluster management across 200 nodes, automating deployment processes and achieving 99.98 percent uptime for critical services

Migrated legacy monolithic applications to event-driven architecture, improving system scalability by 350 percent during peak loads

Conducted security audits and implemented zero-trust networking principles, eliminating three critical vulnerabilities in production environments

Junior Systems Engineer

Novo Nordisk

novonordisk.com

Bagsvaerd, Denmark

September 2018 - February 2020

Supported deployment and maintenance of internal monitoring systems for 50 applications across development and staging environments

Documented infrastructure procedures and created runbooks for incident response, reducing mean time to resolution from 2.5 hours to 1.2 hours

Assisted in Linux server provisioning and configuration management using Ansible and Puppet across 80 physical machines

Participated in on-call rotation and resolved network connectivity issues for research and development teams

EDUCATION

Master of Science in Computer Science

Technical University of Denmark (DTU)

Kongens Lyngby, Denmark

Graduated June 2018

Thesis: Advanced Container Orchestration Strategies for Enterprise Workloads

Bachelor of Science in Information Technology

Technical University of Denmark (DTU)

Kongens Lyngby, Denmark

Graduated June 2016

Specialization: Systems Architecture and Cloud Computing

TECHNICAL SKILLS

Cloud Platforms: AWS, Azure, Google Cloud Platform, Kubernetes, Docker, OpenStack

Programming Languages: Python, Go, Java, Bash, TypeScript, C++

Infrastructure as Code: Terraform, CloudFormation, Ansible, Puppet, Helm

Databases: PostgreSQL, MongoDB, Redis, DynamoDB, Elasticsearch

DevOps Tools: Jenkins, GitLab CI, GitHub Actions, Prometheus, Grafana, ELK Stack

Networking: TCP/IP, DNS, Load Balancing, VPN, SDN, BGP

Security: SSL/TLS, IAM, Vault, Network Segmentation, OWASP, SOC2 Compliance

Monitoring and Logging: Datadog, New Relic, Splunk, CloudWatch, Stackdriver

Agile Methodologies: Scrum, Kanban, OKR Planning, Lean Six Sigma

CERTIFICATIONS

AWS Certified Solutions Architect Professional

Kubernetes Application Developer Certification (CKAD)

HashiCorp Certified Terraform Associate

LANGUAGES

Danish (Native)

English (Fluent)

German (Conversational)
