PROFESSIONAL SUMMARY

Results-driven Senior DevOps Engineer with 6 years of hands-on experience designing, implementing, and maintaining scalable cloud infrastructure and CI/CD pipelines. Proven expertise in containerization, Kubernetes orchestration, and infrastructure-as-code practices across AWS and Azure environments. Strong track record of optimizing deployment processes, reducing downtime, and leading infrastructure modernization initiatives that improve system reliability and team productivity. Passionate about automation, monitoring, and building robust platforms that enable development teams to ship code faster and safer.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, RDS, Lambda, CloudFormation), Azure (VMs, AKS, App Service), Google Cloud Platform

Containerization: Docker, Kubernetes, Helm, Docker Compose

CI/CD Tools: Jenkins, GitLab CI/CD, GitHub Actions, CircleCI

Infrastructure as Code: Terraform, CloudFormation, Ansible

Monitoring and Logging: Prometheus, Grafana, ELK Stack, Datadog, New Relic

Programming Languages: Python, Bash, Go, YAML

Databases: PostgreSQL, MySQL, Redis, MongoDB

Version Control: Git, GitHub, GitLab

Linux: CentOS, Ubuntu, Debian

Other Tools: ArgoCD, Vault, Nginx, Apache

WORK EXPERIENCE

Senior DevOps Engineer

TechFlow Solutions

Amsterdam, Netherlands

techflowsolutions.io

January 2022 - Present

Led migration of legacy monolithic applications to Kubernetes-based microservices architecture, reducing deployment time by 75% and improving system scalability for 50+ services.

Designed and implemented comprehensive monitoring and observability stack using Prometheus and Grafana, enabling proactive incident detection and reducing mean time to resolution by 40%.

Established infrastructure-as-code best practices using Terraform, managing AWS resources for 12 development teams and ensuring consistent, reproducible infrastructure deployments across staging and production environments.

Mentored 3 junior DevOps engineers on cloud architecture, containerization strategies, and incident response procedures, resulting in improved team capability and reduced operational toil.

DevOps Engineer

CloudCore Systems

Amsterdam, Netherlands

cloudcore.io

June 2019 - December 2021

Architected and deployed a multi-region AWS infrastructure supporting 200+ concurrent users, implementing auto-scaling policies and load balancing strategies that achieved 99.95% uptime.

Built comprehensive CI/CD pipelines using GitHub Actions and Jenkins, automating testing, security scanning, and deployment processes for 25+ microservices and reducing manual deployment overhead by 60%.

Implemented containerization strategy using Docker and maintained Kubernetes clusters with managed node groups, standardizing deployment practices across the organization.

Established disaster recovery and backup procedures including automated daily backups and point-in-time recovery testing, with RTO of 4 hours and RPO of 1 hour.

Junior DevOps Engineer

DataVault Analytics

Rotterdam, Netherlands

datavault-analytics.net

July 2018 - May 2019

Maintained and optimized Jenkins CI/CD pipelines supporting 8 development teams, reducing build times by 35% through pipeline optimization and parallel execution strategies.

Managed AWS infrastructure provisioning and day-to-day operations including EC2 instances, RDS databases, and S3 buckets, ensuring proper security groups, IAM roles, and backup policies.

Deployed and configured monitoring solutions using dbt and ELK Stack for log aggregation, creating dashboards that provided visibility into application performance metrics and infrastructure health.

Collaborated with development teams to troubleshoot deployment issues, perform root cause analysis, and implement preventive measures that improved overall system reliability.

EDUCATION

Bachelor of Science in Computer Science

University of Amsterdam

Amsterdam, Netherlands

Graduated: June 2018

PROFESSIONAL CERTIFICATIONS

AWS Certified Solutions Architect - Associate

Kubernetes Application Developer (CKAD)

HashiCorp Certified: Terraform Associate

NOTABLE PUBLIC REPOSITORIES

github.com/marcusvandenberg/kubernetes-multi-env-helm - Comprehensive Helm chart templates for multi-environment Kubernetes deployments with ArgoCD integration

github.com/marcusvandenberg/terraform-aws-infrastructure - Reusable Terraform modules for AWS infrastructure including VPC, RDS, ECS, and security configurations

github.com/marcusvanderberg/prometheus-monitoring-stack - Complete Prometheus and Grafana setup with custom dashboards and alerting rules for Kubernetes clusters

github.com/marcusvanderberg/docker-optimization-guide - Best practices and examples for optimizing Docker images, reducing build times and container size
