PROFESSIONAL SUMMARY

Results-driven Senior Machine Learning Engineer with 6 years of experience building and deploying scalable ML solutions across fintech and healthcare sectors. Proven expertise in developing end-to-end machine learning pipelines, leading cross-functional teams, and optimizing model performance in production environments. Passionate about translating complex data science challenges into actionable business insights and driving innovation through advanced analytics.

WORK EXPERIENCE

Senior Machine Learning Engineer

Synapse Data Ltd

Manchester, United Kingdom

synapsedataltd.io

January 2021 - Present

Architected and deployed machine learning models serving 2 million+ daily predictions in production environments, improving model accuracy from 87% to 94% through advanced feature engineering and ensemble techniques.

Led a team of 3 junior ML engineers and 2 data scientists, conducting code reviews, establishing ML best practices, and mentoring on advanced algorithmic concepts.

Implemented automated retraining pipelines and monitoring systems using Python and cloud-based solutions, reducing model degradation incidents by 78% year-over-year.

Collaborated with product and engineering teams to define requirements for real-time ML inference, achieving sub-100ms latency for customer-facing recommendation systems.

Machine Learning Engineer

Barclays Bank PLC

Manchester, United Kingdom

barclays.com

March 2019 - March 2021

Developed predictive models for fraud detection that flagged 92% of suspicious transactions while maintaining false positive rates below 2%, protecting customer assets and reducing financial losses.

Optimized XGBoost and neural network models through hyperparameter tuning and cross-validation strategies, improving AUC scores from 0.81 to 0.89 on validation datasets.

Maintained and updated production ML systems supporting regulatory compliance and risk assessment functions across multiple business units.

Presented quarterly findings to senior stakeholders and executive leadership, translating technical metrics into business impact assessments and ROI calculations.

Junior Machine Learning Engineer

Genomics Insights Healthcare Ltd

London, United Kingdom

genomicsinsights.com

September 2018 - February 2019

Built machine learning classifiers for genomic sequence analysis, supporting early-stage cancer detection research with 85% sensitivity on test datasets.

Processed and cleaned large-scale biological datasets containing millions of genetic sequences using Python pandas and NumPy libraries.

Collaborated with research scientists to validate model outputs against ground truth clinical data and iterate on feature selection methodologies.

Documented model architectures, training procedures, and validation results in technical reports for publication and internal knowledge sharing.

EDUCATION

Bachelor of Science in Computer Science

University of Manchester

Manchester, United Kingdom

Graduated: June 2018

TECHNICAL SKILLS

Machine Learning: TensorFlow, PyTorch, Scikit-learn, XGBoost, LightGBM, Neural Networks, Deep Learning, Ensemble Methods, Supervised Learning, Unsupervised Learning

Data Processing and Analysis: Python, Pandas, NumPy, SQL, Apache Spark, Data Wrangling, Feature Engineering

Model Deployment and Infrastructure: Docker, Kubernetes, Terraform, ArgoCD, Cloud Platforms (AWS, Google Cloud), Model Serving, MLOps

Specialized Techniques: Natural Language Processing, Computer Vision, Time Series Analysis, Recommender Systems, Anomaly Detection

Version Control: Git, GitLab, GitHub

Visualization and Reporting: Matplotlib, Seaborn, Tableau, Power BI
