PROFESSIONAL SUMMARY

Experienced Data Engineer with 7 years of progressive expertise in designing, building, and maintaining large-scale data infrastructure and ETL pipelines. Proven track record of optimizing data workflows, implementing cloud solutions, and leading technical initiatives across cross-functional teams. Passionate about transforming raw data into actionable insights through robust engineering practices and modern data technologies.

WORK EXPERIENCE

Senior Data Engineer

Synapse Data Ltd

<https://synapsedataltd.io>

Lisbon, Portugal

March 2022 - Present

Architected and deployed end-to-end data pipelines processing 2TB+ daily data volume using Apache Spark and Airflow across production environments

Led migration of legacy batch systems to real-time streaming infrastructure using Kafka, reducing data latency from hours to minutes

Optimized data warehouse queries and indexing strategies in PostgreSQL and Snowflake, achieving 40% improvement in query performance

Mentored junior data engineers and established best practices for data quality, security, and compliance across the organization

Data Engineer

Farfetch

<https://www.farfetch.com>

Lisbon, Portugal

June 2019 - February 2022

Designed and implemented scalable ETL processes using Python and PySpark for e-commerce analytics serving 100+ stakeholders

Developed and maintained automated data ingestion pipelines from multiple sources including APIs, databases, and third-party platforms using Apache NiFi

Implemented comprehensive data validation frameworks and monitoring systems, reducing data quality incidents by 65%

Collaborated with Data Science and Analytics teams to deliver self-service analytics solutions on cloud infrastructure

Junior Data Engineer

NovaTech Solutions Ltd

<https://novatechsolutions.net>

Lisbon, Portugal

January 2017 - May 2019

Built and maintained SQL-based data pipelines supporting business intelligence and reporting requirements for stakeholders across the organization

Developed Python scripts for data extraction, transformation, and loading from various relational and NoSQL databases

Assisted in cloud migration projects, transitioning on-premise infrastructure to AWS and implementing cost optimization strategies

Supported production data systems and participated in on-call rotation, ensuring 99.5% uptime for critical data infrastructure

EDUCATION

Master of Science in Computer Science

Instituto Superior Tecnico, Lisbon, Portugal

2015 - 2017

Bachelor of Science in Computer Science

Instituto Superior Tecnico, Lisbon, Portugal

2011 - 2015

TECHNICAL SKILLS

Languages: Python, SQL, Scala, Java, Bash

Big Data Technologies: Apache Spark, Apache Kafka, Apache Airflow, Apache NiFi, Hadoop

Cloud Platforms: AWS (S3, EC2, RDS, Redshift, Lambda), Google Cloud Platform, Azure Data Factory

Databases: PostgreSQL, MySQL, MongoDB, Cassandra, Snowflake, BigQuery

Data Warehousing: Snowflake, Amazon Redshift, Google BigQuery

ETL Tools: Talend, Informatica, Apache NiFi, Custom Python frameworks

Version Control: Git, GitLab, GitHub

Containerization: Docker, Kubernetes

Monitoring and Logging: ELK Stack, Datadog, CloudWatch

Methodologies: Agile, Scrum, Test-Driven Development
