PROFESSIONAL SUMMARY

Ambitious and detail-oriented BI Analyst with a passion for transforming data into actionable insights. Experienced in building dashboards, performing data analysis, and supporting business decision-making through visualisation and reporting. Strong foundation in SQL and business intelligence tools with a keen interest in developing technical skills further. Committed to delivering reliable data solutions that drive meaningful business outcomes.

WORK EXPERIENCE

BI Analyst

DataViz Solutions

www.dataviz-solutions.io

Glasgow, United Kingdom

January 2024 - Present

- Developed and maintained 15+ interactive dashboards using Tableau to track key performance indicators across multiple business units
- Performed ad-hoc data analysis to support executive decision-making, delivering insights on sales trends and customer segmentation
- Optimised SQL queries for improved performance on large datasets, reducing report generation time by 35%
- Collaborated with stakeholders to gather requirements and translated business needs into technical specifications for new reports

Junior Data Analyst

Edinburgh Analytics Group

www.edinburghanalytics.co

Edinburgh, United Kingdom

October 2023 - December 2024

- Created and monitored Power BI reports for financial and operational metrics, ensuring data accuracy and timeliness
- Performed data validation and cleansing on datasets containing 500,000+ records to improve data quality
- Assisted in the implementation of a new data warehouse, working with the technical team to map legacy systems
- Documented data processes and created user guides for business stakeholders to enhance self-service reporting capabilities

Data Support Analyst

Insight Business Solutions Ltd

www.insightbiz.net

Glasgow, United Kingdom

June 2023 - September 2023

- Extracted and analysed data from multiple sources using SQL to support daily operational reporting
- Assisted in the development of KPI dashboards using Tableau to monitor business performance
- Provided technical support to end-users, troubleshooting data access issues and training staff on report usage
- Maintained data documentation and contributed to the creation of a data glossary for improved team collaboration
