PROFESSIONAL SUMMARY

Experienced DevOps Engineer with 5 years of hands-on experience designing, implementing and maintaining cloud infrastructure and CI/CD pipelines. Proven track record of automating deployment processes, improving system reliability and reducing operational overhead. Strong background in AWS, containerization and infrastructure as code. Passionate about streamlining development workflows and fostering collaboration between development and operations teams.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, RDS, Lambda, CloudFormation), Azure, Digital Ocean

Containerization: Docker, Docker Compose

Container Orchestration: Kubernetes, Docker Swarm, Terraform, ArgoCD

CI/CD Tools: Jenkins, GitLab CI, CircleCI, GitHub Actions

Infrastructure as Code: Terraform, CloudFormation, Ansible

Monitoring and Logging: Prometheus, Grafana, ELK Stack, CloudWatch

Version Control: Git, GitHub, GitLab

Operating Systems: Linux (Ubuntu, CentOS), Windows Server

Scripting Languages: Bash, Python, PowerShell

Databases: PostgreSQL, MySQL, MongoDB

Other Tools: Nginx, Apache, Apache Kafka, Docker Registry

WORK EXPERIENCE

Senior DevOps Engineer

CloudScale Solutions

cloudscale.io

Edinburgh, Scotland

January 2022 - Present

Designed and deployed automated CI/CD pipelines using GitLab CI that reduced deployment times by 60% and enabled 40+ releases per week

Managed Kubernetes clusters hosting 25+ microservices, implementing resource quotas and autoscaling policies to optimize costs by 35%

Implemented comprehensive monitoring and alerting infrastructure using Prometheus and Grafana, reducing MTTR from 45 minutes to 12 minutes

Mentored junior DevOps engineers and conducted knowledge sharing sessions on infrastructure best practices and cloud architecture patterns

DevOps Engineer

Nexus Digital Ltd

nexusdigital.co.uk

Edinburgh, Scotland

June 2020 - December 2021

Architected and managed multi-region AWS infrastructure serving 50+ microservices with 99.95% uptime SLA

Developed Python scripts using GitHub Actions to automate infrastructure provisioning and configuration management tasks across 200+ servers

Implemented dbt data pipeline orchestration to transform and load analytics data from multiple sources into data warehouse

Established ELK stack for centralized logging across all services, improving debugging efficiency and enabling rapid incident response

Created runbooks and disaster recovery procedures that reduced RTO from 4 hours to 30 minutes

Junior DevOps Engineer

TechVenture Systems

techventure.net

Edinburgh, Scotland

March 2019 - May 2020

Managed and maintained 15+ Linux servers running containerized applications, ensuring 99.9% uptime

Automated routine operational tasks using Bash scripts, saving 15 hours per week of manual work

Supported development teams with infrastructure provisioning and troubleshooting of application deployment issues

Assisted in migration of legacy applications from on-premise infrastructure to AWS cloud environment

EDUCATION

Bachelor of Science in Computer Science

University of Edinburgh

Edinburgh, Scotland

Graduated: June 2018

GITHUB REPOSITORIES

github.com/jcameronreid/terraform-aws-infrastructure

Reusable Terraform modules for deploying multi-tier AWS infrastructure with VPC, security groups, and load balancing.

github.com/jcameronreid/kubernetes-monitoring-stack

Complete Kubernetes monitoring solution using Prometheus, Grafana and AlertManager with example dashboards and alert rules.

github.com/jcameronreid/docker-compose-wordpress

Production-ready Docker Compose stack for WordPress with Nginx reverse proxy, PostgreSQL and automated backups.

github.com/jcameronreid/cicd-pipeline-templates

Reusable CI/CD pipeline templates for Jenkins and GitLab CI supporting multi-stage deployments to staging and production environments.
