PROFESSIONAL SUMMARY

Experienced DevOps Engineer with 8 years of progressive expertise in designing, deploying, and maintaining scalable cloud infrastructure and CI/CD pipelines. Proven track record of optimizing system performance, reducing deployment times, and implementing automation solutions across multi-cloud environments. Strong background in containerization, infrastructure as code, and leading cross-functional teams to achieve operational excellence and reliability targets.

WORK EXPERIENCE

Senior DevOps Engineer

TechVault Solutions

Copenhagen, Denmark

<https://techvault.io>

January 2022 - Present

Architected and implemented a comprehensive Kubernetes cluster management system supporting 150+ microservices, reducing deployment time by 65 percent and improving system reliability to 99.9 percent uptime

Designed and deployed a multi-region disaster recovery solution using Terraform and AWS CloudFormation, ensuring business continuity and reducing RTO from 4 hours to 15 minutes

Led a team of 4 junior DevOps engineers, mentoring them on industry best practices and establishing standardized deployment procedures across all development teams

Implemented comprehensive monitoring and observability stack using Prometheus, Grafana, and ELK, enabling proactive issue detection and reducing mean time to resolution by 40 percent

DevOps Engineer

CloudNine Systems

Aarhus, Denmark

<https://cloudninesys.net>

June 2018 - December 2021

Built and maintained Jenkins-based CI/CD pipelines processing 500+ deployments daily, automating infrastructure provisioning and reducing manual configuration errors by 85 percent

Migrated legacy applications from on-premises infrastructure to AWS, optimizing costs by 45 percent and improving application performance through proper resource allocation

Developed custom Python scripts and Ansible playbooks for infrastructure automation, managing infrastructure across 3 AWS regions and multiple availability zones

Established and documented security best practices including network segmentation, container image scanning, and secrets management using HashiCorp Vault

DevOps Engineer

DataFlow Technologies

Odense, Denmark

<https://dataflowtech.co>

August 2016 - May 2018

Managed Docker containerization of 40+ applications, implementing container orchestration and improving deployment consistency across development and production environments

Automated database backup and recovery procedures, reducing backup time by 50 percent and ensuring zero data loss during critical incidents

Configured and maintained ELK stack for log aggregation and analysis across 100+ servers, enabling faster troubleshooting and incident response

Implemented infrastructure monitoring using Nagios and custom alerting systems, establishing alert thresholds and on-call procedures for 24/7 operational support

EDUCATION

Bachelor of Science in Computer Science

Technical University of Denmark (DTU)

Kongens Lyngby, Denmark

Graduated: June 2016

TECHNICAL SKILLS

Cloud Platforms: AWS, Azure, Google Cloud Platform

Container Technologies: Docker, Kubernetes, Docker Swarm

Infrastructure as Code: Terraform, Ansible, CloudFormation, Helm

CI/CD Tools: Jenkins, GitLab CI/CD, GitHub Actions, CircleCI

Scripting Languages: Python, Bash, Go

Monitoring and Logging: Prometheus, Grafana, ELK Stack, Datadog

Version Control: Git, GitLab, GitHub

Databases: PostgreSQL, MySQL, MongoDB, Redis

Security Tools: HashiCorp Vault, SonarQube, Trivy

Operating Systems: Linux (CentOS, Ubuntu, Debian), Windows Server
