PROFESSIONAL SUMMARY

Results-driven Data Scientist with 5 years of experience building predictive models and delivering data-driven insights across fintech, retail, and technology sectors. Skilled in Python, SQL, and machine learning frameworks with a proven track record of translating complex datasets into actionable business recommendations. Passionate about solving real-world problems through statistical analysis and data visualization, with strong communication abilities across technical and non-technical stakeholders.

WORK EXPERIENCE

Data Scientist

NexaData Analytics

nexadata.io

Birmingham, United Kingdom

March 2022 - Present

Developed and deployed 12+ machine learning models in production using Python and scikit-learn, improving customer churn prediction accuracy from 78% to 86% and saving the company £180,000 annually in retention costs

Built automated ETL pipelines processing 2.5 million daily records using SQL and Apache Spark, reducing data processing time by 40% and improving reporting efficiency

Conducted A/B testing and statistical analysis for marketing campaigns, identifying optimization opportunities that increased conversion rates by 15% across multiple customer segments

Mentored two junior data analysts, establishing best practices for code documentation, reproducibility, and version control within the data science team

Senior Data Analyst

Vertex Insights Limited

vertexinsights.co.uk

London, United Kingdom

June 2020 - February 2022

Created 25+ interactive dashboards and visualizations using Tableau and Power BI, enabling stakeholders to monitor KPIs across 15 business units in real-time

Implemented customer segmentation strategy using unsupervised learning techniques, identifying five distinct customer profiles that informed targeted marketing campaigns valued at £2.3 million in annual revenue

Designed and executed data quality assessments across enterprise databases, documenting 340 data integrity issues and driving remediation efforts that achieved 99.2% data accuracy

Collaborated with product and engineering teams to translate business requirements into technical specifications for 8 analytical projects, maintaining 100% on-time delivery rate

Data Analyst

TechForward Solutions

techforward.net

Birmingham, United Kingdom

January 2019 - May 2020

Performed exploratory data analysis on customer behavioral datasets containing 5+ million records, uncovering insights that informed product roadmap decisions and resulted in three new feature releases

Automated monthly reporting processes using Python and SQL, reducing manual reporting time from 16 hours to 2 hours and enabling earlier stakeholder decision-making

Developed predictive models for demand forecasting with 87% accuracy, supporting inventory management and reducing excess stock by 22% across distribution centers

Created comprehensive data documentation and maintained technical specifications for 12 analytical projects, ensuring knowledge transfer and reducing onboarding time for new team members

EDUCATION

Bachelor of Science in Computer Science

University of Birmingham

Birmingham, United Kingdom

September 2014 - June 2018

TECHNICAL SKILLS

Programming Languages: Python, SQL, R, Bash

Machine Learning: scikit-learn, XGBoost, TensorFlow, supervised and unsupervised learning algorithms, time series forecasting

Data Manipulation and Analysis: Pandas, NumPy, Excel, data cleaning and feature engineering

Data Visualization: Tableau, Power BI, Matplotlib, Seaborn, Plotly

Databases: PostgreSQL, MySQL, MongoDB, SQL Server

Cloud Platforms: AWS (S3, EC2, SageMaker), Google Cloud Platform

Big Data Technologies: Apache Spark, Hadoop

Statistical Analysis: hypothesis testing, A/B testing, regression analysis, ANOVA

Version Control: Git, GitHub

Other Tools: Jupyter Notebook, Docker, Linux command line

ADDITIONAL INFORMATION

Certifications: AWS Certified Cloud Practitioner (2021)

Languages: English (Native), French (Conversational)
