PROFESSIONAL SUMMARY

Results-driven Data Engineer with 4 years of progressive experience building and optimizing data infrastructure. Proven track record of designing scalable ETL pipelines and implementing data solutions that drive business intelligence. Passionate about data quality and performance optimization, with strong expertise in cloud platforms and modern data stack technologies.

WORK EXPERIENCE

Staff Data Engineer

DataStream Analytics Inc

Zurich, Switzerland

www.datastream-analytics.io

January 2023 - Present

Led architectural decisions for enterprise-wide data platform serving 200+ stakeholders across the organization

Managed a cross-functional team of 15 data engineers and data analysts, overseeing all pipeline development and deployment

Designed and implemented a real-time data warehouse processing 500GB of data daily using Apache Spark and PySpark

Established data governance frameworks and quality metrics that reduced data issues by 72%

Senior Data Engineer

UBS

Zurich, Switzerland

www.ubs.com

June 2022 - December 2022

Architected multiple ETL pipelines using Python and Apache Airflow for financial data processing

Optimized SQL queries reducing query execution time by 45% for critical reporting dashboards

Mentored 8 junior engineers on best practices in data engineering and cloud infrastructure

Migrated legacy batch processes to cloud-based solutions on AWS, reducing operational costs by 35%

Junior Data Engineer

Credit Suisse

Zurich, Switzerland

www.credit-suisse.com

March 2020 - May 2022

Developed and maintained data pipelines using SQL and Python for various business units

Created automated reporting solutions using Tableau and SQL Server that improved reporting efficiency by 40%

Collaborated with analytics teams to design and optimize database schemas for improved performance

Participated in on-call rotation and resolved production data pipeline issues within SLA targets

EDUCATION

Master of Science in Computer Science

ETH Zurich (Swiss Federal Institute of Technology Zurich)

Zurich, Switzerland

Graduated: June 2020

TECHNICAL SKILLS

Programming Languages: Python, SQL, Java, Scala

Big Data Technologies: Apache Spark, Apache Hadoop, Apache Flink, Kafka

Cloud Platforms: AWS (EC2, S3, RDS, Redshift), Google Cloud Platform (BigQuery), Azure Data Lake

Containerization and Orchestration: Docker, Kubernetes, Docker Compose

Infrastructure as Code: Terraform, CloudFormation, ArgoCD

Data Warehousing: Snowflake, Redshift, BigQuery, PostgreSQL, MySQL

ETL Tools: Apache Airflow, Talend, Informatica

Data Formats: Parquet, Avro, JSON, CSV, Protocol Buffers

Version Control: Git, GitHub, Bitbucket

Monitoring and Logging: Prometheus, ELK Stack, Datadog

Additional: Data quality frameworks, dimensional modeling, GDPR compliance, agile methodologies

LANGUAGES

German: Native

English: Fluent

French: Intermediate
