PROFESSIONAL SUMMARY

Highly motivated and results-driven Full Stack Engineer with 8 years of proven track record in spearheading cutting-edge technological solutions. Passionate about leveraging cross-functional collaboration to deliver actionable insights and drive organisational objectives through mission-critical applications. Champion of innovative approaches, committed to synergistically integrating data-driven decision making while advancing dynamic engineering practices to unlock maximum value for stakeholders.

WORK EXPERIENCE

Senior Full Stack Engineer

TechVision Solutions, Paris

techvision.io

January 2021 - Present

Spearheaded development of microservices architecture supporting 2+ million daily active users, implementing advanced HuggingFace Transformers models for natural language processing features

Led migration of legacy monolithic application to modern cloud-native stack using Kubernetes and containerization, reducing infrastructure costs by 28%

Mentored team of 4 junior engineers on full stack development best practices and code quality standards, establishing internal coding guidelines adopted company-wide

Implemented comprehensive CI/CD pipelines with GitHub Actions, improving deployment frequency from quarterly to bi-weekly releases

Full Stack Developer

DataFlow Systems, Lyon

dataflow.co

June 2018 - December 2020

Developed end-to-end data analytics platform processing 500GB+ daily using LangChain for advanced query processing and semantic analysis capabilities

Built RESTful APIs and web interfaces using Node.js, React, and PostgreSQL serving 50+ enterprise clients across EMEA region

Optimised database performance through query tuning and indexing strategies, achieving 40% improvement in average response times

Collaborated with product and design teams to translate business requirements into technical specifications and user-facing features

Junior Full Stack Engineer

WebDynamics, Toulouse

webdynamics.net

September 2016 - May 2018

Constructed responsive web applications using Angular, Express.js, and MongoDB for internal tools and client-facing products

Utilised dbt for data transformation pipelines and advanced business intelligence workflows to support analytics initiatives

Participated in agile development cycle including daily standups, sprint planning, and retrospectives with cross-functional teams

Contributed to open source projects and maintained technical documentation for codebase and deployment procedures

EDUCATION

Master of Science in Computer Science

Université Pierre et Marie Curie (Sorbonne Université), Paris

Graduated: June 2016

GPA: 3.7/4.0

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML, CSS

Frontend: React, Vue.js, Angular, Redux, Material-UI, Tailwind CSS

Backend: Node.js, Express.js, Django, FastAPI, RESTful APIs

Databases: PostgreSQL, MongoDB, MySQL, Redis, Elasticsearch

Cloud & DevOps: AWS, Docker, Kubernetes, Terraform, ArgoCD, Prometheus

Tools & Platforms: Git, JIRA, Linux, Webpack, Jest, Postman, DataDog

LANGUAGES

French - Native

English - Fluent

German - Intermediate
