PROFESSIONAL SUMMARY

Experienced Full Stack Engineer with 7 years of professional development across startups and mid-scale enterprises in Berlin. Proficient in modern JavaScript frameworks, cloud infrastructure, and database design with a proven track record of delivering scalable web applications. Strong problem-solver who bridges frontend and backend development while mentoring junior developers and driving technical decision-making across teams.

WORK EXPERIENCE

Senior Full Stack Engineer

TechVenture GmbH

Berlin, Germany

September 2022 - Present

Architected and developed microservices-based platform serving 500K+ monthly users using Node.js and React, reducing API response times by 40% through optimization and caching strategies.

Led technical onboarding and mentorship of 4 junior developers, establishing code review practices and contributing to team capacity growth of 150% within 18 months.

Designed PostgreSQL database schemas and implemented Redis caching layers, improving system performance and reducing infrastructure costs by 25%.

Implemented CI/CD pipelines using GitHub Actions and Docker, reducing deployment time from 45 minutes to 8 minutes and enabling daily releases.

Full Stack Developer

CloudSync Solutions (www.cloudsync-solutions.io)

Berlin, Germany

January 2020 - August 2022

Developed and maintained full-stack web application for data synchronization services using Vue.js and Python Flask, serving enterprise clients across DACH region.

Migrated legacy monolithic architecture to containerized microservices on AWS ECS, improving system reliability from 96% to 99.8% uptime.

Built REST and GraphQL APIs handling 2 million requests daily, implementing proper authentication, rate limiting, and comprehensive API documentation.

Collaborated with product and design teams to translate requirements into technical specifications, delivering 15+ feature releases with zero critical production incidents.

Junior Full Stack Developer

Digital Innovation Labs

Berlin, Germany

June 2017 - March 2020

Contributed to multiple client projects utilizing JavaScript, React, and Node.js across healthcare, fintech, and e-commerce sectors.

Developed responsive frontend interfaces using HTML5, CSS3, and modern JavaScript frameworks, ensuring cross-browser compatibility and mobile optimization.

Participated in agile development cycles with 2-week sprints, attending daily standups and collaborating with 8-person development team.

Assisted in database design and optimization tasks, creating SQL queries and performing basic DevOps operations on AWS infrastructure.

EDUCATION

Bachelor of Science in Computer Science

Technical University of Berlin (TU Berlin)

Berlin, Germany

2013 - 2017

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, TypeScript, SQL, HTML5, CSS3

Frontend Frameworks: React, Vue.js, Next.js

Backend Technologies: Node.js, Express.js, Flask, Django

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud Platforms: AWS (EC2, S3, RDS, ECS, Lambda), Google Cloud Platform

DevOps and Tools: Docker, Kubernetes, GitHub Actions, GitLab CI, Nginx

APIs: REST, GraphQL, WebSockets

Methodologies: Agile, Scrum, Test-Driven Development
