PROFESSIONAL SUMMARY

Results-driven Staff Engineer with 12 years of progressive experience in designing and delivering scalable software solutions across fintech and e-commerce sectors. Proven track record of leading technical initiatives, mentoring junior engineers, and driving architectural improvements that reduce system complexity. Strong background in cloud infrastructure, backend services, and cross-functional collaboration with product and operations teams.

WORK EXPERIENCE

Staff Engineer

CloudVault Systems, Manchester

www.cloudvaultsystems.io

November 2021 - Present

Architected and led migration of monolithic payment processing system to microservices, reducing latency by 40% and improving system throughput to 50k transactions per second. Implemented comprehensive monitoring and observability solutions using Prometheus and Grafana across 15+ production services. Mentored team of 5 junior and mid-level engineers, conducting weekly code reviews and technical design sessions. Established internal platform engineering practices resulting in 35% reduction in infrastructure provisioning time through HuggingFace Transformers and automated deployment pipelines.

Senior Software Engineer

DataFlow Solutions Ltd, Manchester

www.dataflowsolutions.co

June 2018 - October 2021

Led design and implementation of real-time analytics platform processing 500 million events daily using Apache Kafka and Spark. Developed dbt-based data transformation pipelines enabling stakeholders to self-serve analytics and reduce reporting time from days to hours. Collaborated with security team to implement end-to-end encryption protocols across data pipeline, achieving SOC 2 Type II certification. Architected GitHub Actions CI/CD workflows reducing deployment cycles from 4 hours to 15 minutes.

Software Engineer

Pivot Technologies plc, Manchester

www.pivottechnologies.net

July 2012 - May 2018

Developed and maintained distributed backend services for e-commerce platform serving 2 million monthly users across Europe. Built automated testing frameworks reducing production incidents by 55% and improving code coverage from 45% to 82%. Implemented caching strategies using Redis that decreased API response times by 60% for high-traffic endpoints. Collaborated with DevOps team to establish containerization standards using Docker, standardizing deployment across 40+ microservices.

EDUCATION

Bachelor of Science in Computer Science
University of Manchester, Manchester
Graduated: June 2012

TECHNICAL SKILLS

Backend Development: Java, Python, Go, C++
Cloud Platforms: AWS, Google Cloud Platform, Azure
Container Orchestration: Kubernetes, Docker, Docker Compose, Terraform, ArgoCD
Databases: PostgreSQL, MySQL, MongoDB, Redis, DynamoDB
Message Queues: Apache Kafka, RabbitMQ
DevOps Tools: Terraform, Ansible, Jenkins
Monitoring and Logging: Prometheus, Grafana, ELK Stack
Architecture: Microservices, Event-Driven Architecture, CQRS
Version Control: Git, GitLab, Bitbucket
Agile Methodologies: Scrum, Kanban

CERTIFICATIONS

AWS Solutions Architect Associate (2020)
Certified Kubernetes Administrator (2022)
