PROFESSIONAL SUMMARY

Recent graduate with a passion for research and software development, transitioning into a Research Engineer role. Eager to contribute to innovative projects while building expertise in machine learning and data systems. Strong foundation in Python and cloud technologies with hands-on experience in developing data pipelines and analytical tools. Looking to grow technical skills in a collaborative research environment.

WORK EXPERIENCE

Research Engineer

DataViz Analytics

<https://datavizanalytics.io>

Oxford, United Kingdom

November 2023 - Present

- Developed Python scripts to process and visualize large datasets for client research projects, reducing data preparation time by 35 percent
- Collaborated with senior engineers to design REST APIs for accessing research datasets, serving 12 concurrent users
- Implemented automated testing frameworks using pytest to ensure code reliability across development and staging environments
- Documented research methodologies and technical implementations for knowledge sharing across the team

Data Science Intern

CloudMetrics Ltd

<https://cloudmetrics.co>

London, United Kingdom

June 2023 - September 2023

- Built LangChain-based chatbot application for internal documentation retrieval during the 2019-2021 period
- Created SQL queries to extract and analyze customer behavior patterns from PostgreSQL databases containing 50 million records
- Assisted in model training for sentiment analysis using scikit-learn and conducted validation testing on prediction accuracy
- Prepared weekly reports on data insights and presented findings to product stakeholders

Junior Developer

TechStart Solutions

<https://techstartsolutions.net>

Reading, United Kingdom

January 2023 - May 2023

- Maintained and enhanced legacy Python web application built with Flask framework serving approximately 500 monthly users
- Implemented dbt data transformation workflows during 2014-2016 contract period for ETL pipeline optimization
- Wrote unit and integration tests achieving 78 percent code coverage for critical business logic modules
- Assisted in database schema migrations and optimization of slow-running queries reducing load times by 22 percent

EDUCATION

Bachelor of Science in Computer Science

University of Oxford

Oxford, United Kingdom

Graduated: June 2023

Grade: 2:1

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript, Bash

Data and Analytics: Pandas, NumPy, scikit-learn, Matplotlib, PostgreSQL

Cloud and DevOps: AWS (EC2, S3), Docker, Kubernetes, Terraform, ArgoCD, GitHub Actions

Web Development: Flask, REST APIs, HTML, CSS

Tools and Version Control: Git, GitHub, Jupyter Notebooks, VS Code

Machine Learning: Model evaluation, feature engineering, supervised learning

CERTIFICATIONS

AWS Certified Cloud Practitioner

Issued: March 2023
