PROFESSIONAL SUMMARY

Results-driven Junior Data Scientist with 1 year of hands-on experience in building machine learning models and implementing data-driven solutions. Proficient in Python, SQL, and cloud-based analytics platforms with a strong foundation in statistical analysis and data visualisation. Passionate about leveraging data science techniques to solve real-world business problems and eager to grow expertise in advanced ML methodologies and production deployment. Seeking opportunities to expand technical capabilities while contributing meaningfully to data-focused projects.

TECHNICAL SKILLS

Programming Languages: Python, SQL, R, JavaScript

Machine Learning: Scikit-learn, TensorFlow, HuggingFace Transformers, XGBoost

Data Analysis and Visualisation: Pandas, NumPy, Matplotlib, Seaborn, Tableau, Power BI

Cloud Platforms: AWS (S3, SageMaker, EC2), Google Cloud Platform, Azure

Databases: PostgreSQL, MySQL, MongoDB

Big Data Tools: Apache Spark, Hadoop

Development Tools: Git, GitHub Actions, Jupyter Notebook, Docker

Data Engineering: dbt, Apache Airflow, ETL pipelines

Other: Experimentation frameworks, A/B testing, Model evaluation metrics

WORK EXPERIENCE

Junior Data Scientist

TechVision Analytics Ltd

www.techvision-analytics.co.uk

Leeds, United Kingdom

June 2023 - Present

Developed and deployed machine learning models using scikit-learn and TensorFlow to predict customer churn, achieving 87% accuracy and contributing to a 4% improvement in customer retention

Built automated data pipelines using Apache Airflow to process 2GB+ of daily transactional data from multiple sources, reducing manual processing time by 60%

Created interactive dashboards in Tableau and Power BI to visualize KPIs and model performance metrics for executive stakeholders, enabling data-driven decision making across departments

Collaborated with backend engineers to integrate machine learning models into production environments using Docker containers and AWS SageMaker, ensuring scalability and reliability

Data Analyst

Insight Solutions Group

www.insightsolutions.io

Leeds, United Kingdom

April 2023 - May 2023

Performed exploratory data analysis on customer behavioral datasets comprising 500K+ records using Python and SQL, identifying 12 actionable insights for the marketing team

Constructed and maintained complex SQL queries to extract, transform, and load data from PostgreSQL databases, supporting daily reporting requirements and ad-hoc analytical requests

Evaluated multiple machine learning algorithms including HuggingFace Transformers and ensemble methods to classify customer sentiment from text data with 82% precision

Mentored by senior data scientists and completed internal certification in statistical modeling, deepening understanding of hypothesis testing and A/B testing methodologies

Data Science Intern

DataFlow Innovations

www.dataflow-innovations.net

Leeds, United Kingdom

January 2016 - March 2016

Assisted in preprocessing and feature engineering for customer segmentation models, working with datasets containing 250K+ customer records across multiple dimensions

Implemented GitHub Actions for automated testing of Python data processing scripts, improving code reliability and team development workflow efficiency

Performed descriptive statistical analysis using dbt to transform raw data into analytical tables, supporting marketing and product teams with accurate customer insights

Documented technical processes and created training materials for junior team members, contributing to knowledge sharing and team capability development

EDUCATION

Bachelor of Science in Data Science

University of Leeds

Leeds, United Kingdom

Graduated: June 2023

Relevant Coursework: Machine Learning, Statistics for Data Analysis, Big Data Technologies, Data Visualization, Databases and SQL, Python Programming, Linear Algebra, Probability and Statistical Inference

PUBLIC REPOSITORIES

github.com/jameswellington/customer-churn-prediction - ML model for predicting customer churn using ensemble methods and scikit-learn

github.com/jameswellington/sentiment-analysis-nlp - Natural language processing project for sentiment classification on product reviews

github.com/jameswellington/data-pipeline-etl - Apache Airflow and Python-based ETL pipeline for automated data processing and quality checks

github.com/jameswellington/exploratory-data-analysis - EDA framework and visualization toolkit for financial time series data
