PROFESSIONAL SUMMARY

I'm a junior frontend engineer with a passion for building user-friendly web applications and a strong foundation in modern JavaScript frameworks. With one year of professional experience, I've developed proficiency in React and Vue.js while working on real-world projects in fast-paced environments. I'm eager to expand my skills and contribute to meaningful projects while continuously learning from experienced team members.

TECHNICAL SKILLS

Languages: JavaScript, HTML5, CSS3, TypeScript

Frameworks and Libraries: React, Vue.js, Next.js

Tools and Platforms: Git, GitHub, GitLab, Webpack, npm, yarn

Databases: MongoDB, PostgreSQL

APIs: RESTful APIs, GraphQL basics

Version Control: Git workflow, branch management

Testing: Jest, React Testing Library

Other: Responsive design, Figma, Agile methodologies

WORK EXPERIENCE

Frontend Engineer

TechVision Solutions

Bristol, United Kingdom

www.techvisionsolutions.io

January 2024 - Present

Developed and maintained React components for a customer-facing dashboard application serving 5000+ active users

Implemented responsive design patterns using CSS Grid and Flexbox to ensure compatibility across desktop and mobile devices

Collaborated with backend developers to integrate RESTful APIs and handle asynchronous data fetching with axios

Participated in daily standups and sprint planning meetings using Agile methodology to deliver features on schedule

Junior Frontend Developer

Digital Innovations Ltd

www.digitalinnovations.co.uk

Bristol, United Kingdom

October 2023 - December 2023

Built interactive web interfaces using Vue.js for a SaaS platform focused on project management tools
Fixed critical bugs in production code and implemented hotfixes within tight deadlines
Wrote unit tests using Jest to achieve 75% code coverage on newly developed components
Collaborated with UX designers to translate wireframes into pixel-perfect, accessible HTML and CSS

Junior Web Developer

Pixel Craft Studios

www.pixelcraft.io

Bristol, United Kingdom

March 2023 - January 2024

Created responsive landing pages and marketing websites using HTML5, CSS3, and vanilla JavaScript
Optimized website performance by reducing bundle size by 30% through code splitting and lazy loading techniques
Debugged frontend issues across multiple browsers and devices to ensure consistent user experience
Assisted senior developers in code reviews and learned best practices for clean, maintainable code

EDUCATION

BSc Computer Science

University of Bristol

Bristol, United Kingdom

Graduated: June 2023

Grade: 2:1

GITHUB REPOSITORIES

Frontend Weather App: github.com/jamesturner92/weather-app-react

Interactive portfolio built with React and OpenWeatherMap API, featuring location-based weather forecasting and five-day predictions.

Todo Task Manager: github.com/jamesturner92/vue-todo-manager

Full-featured task management application built with Vue.js and local storage persistence, including priority levels and due dates.

E-commerce Product Filter: github.com/jamesturner92/ecommerce-filters

Dynamic product filtering system with real-time search functionality and price range sliders using vanilla JavaScript.

Personal Portfolio Website: github.com/jamesturner92/portfolio-2023

Responsive portfolio website showcasing projects and skills, built with Next.js and styled with Tailwind CSS.
