PROFESSIONAL SUMMARY

I am a Principal Engineer with 14 years of progressive experience building and leading high-performance systems at scale. My expertise spans cloud architecture, backend systems design, and technical leadership across distributed teams. I have a proven track record of translating complex business requirements into elegant technical solutions while mentoring engineers and driving organizational best practices.

WORK EXPERIENCE

Principal Engineer

Stellar Systems AS

<https://stellarsystems.io>

Copenhagen, Denmark

November 2021 - Present

Architected and deployed a microservices platform serving 2 million daily active users, resulting in 40% reduction in infrastructure costs through optimized resource allocation. Led a team of 12 engineers in designing and implementing event-driven architecture using message queues and asynchronous processing patterns. Established comprehensive monitoring and observability standards across the organization using ELK stack and custom dashboards. Mentored 8 junior and mid-level engineers through structured 1-on-1s and technical knowledge sharing sessions.

Senior Software Engineer

TechCore Solutions ApS

<https://techcoreapps.net>

Aarhus, Denmark

January 2021 - March 2022

Designed and implemented a RESTful API gateway handling 50,000+ requests per second with 99.99% uptime using Node.js and Express framework. Migrated legacy monolithic application to microservices architecture, reducing deployment time by 65% and enabling independent scaling of services. Implemented comprehensive unit and integration test suites achieving 87% code coverage and reducing production bugs by 52%. Collaborated with product and design teams to define API contracts and ensure seamless integration with client applications.

Lead Software Engineer

DataFlow Innovation

<https://dataflowinnov.co>

Copenhagen, Denmark

August 2018 - January 2021

Built and optimized data processing pipelines handling petabyte-scale datasets, reducing query latency from 45 minutes to 8 minutes through indexing strategies and query optimization. Developed Python-based backend services for real-time analytics platform used by 200+ enterprise customers across Nordic region. Established CI/CD practices using Jenkins and Git, automating deployment processes and reducing manual errors by 78%. Implemented database replication and disaster recovery procedures ensuring zero data loss and rapid recovery capabilities.

EDUCATION

Master of Science in Computer Science

Technical University of Denmark (DTU)

Copenhagen, Denmark

Graduated: June 2010

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL, Bash

Cloud Platforms: AWS, Google Cloud Platform, Azure

Databases: PostgreSQL, MongoDB, Redis, DynamoDB, Elasticsearch

DevOps and Infrastructure: Docker, Kubernetes, Terraform, ArgoCD, Jenkins, GitLab CI/CD

Frameworks and Tools: Node.js, Express, Django, FastAPI, RabbitMQ, Apache Kafka

Methodologies: Microservices Architecture, Event-Driven Architecture, SOLID Principles, Agile/Scrum

Leadership: Team Management, Code Review, Technical Documentation, Mentoring
