PROFESSIONAL SUMMARY

Seasoned Principal Engineer with 14 years of progressive experience architecting and delivering large-scale distributed systems for Fortune 500 companies and high-growth startups across Europe. Proven track record leading cross-functional engineering teams, driving technical strategy, and modernizing legacy infrastructure. Passionate about building resilient, scalable systems and mentoring the next generation of engineering talent in collaborative, innovation-focused environments.

WORK EXPERIENCE

Principal Engineer

Société Générale

www.societegenerale.com

Paris, France

August 2021 - Present

Led architectural design and implementation of microservices-based trading platform serving 500+ internal users with 99.99% uptime SLA

Architected migration of monolithic payment processing system to distributed architecture, reducing latency by 67% and improving transaction throughput to 50,000 requests per second

Established and enforced engineering standards, code quality frameworks, and deployment automation across 12-member engineering team

Mentored 8 junior engineers on system design principles, code reviews, and best practices for production-grade systems

Staff Engineer

CloudPeak Technologies Ltd

www.cloudpeak.io

Lyon, France

January 2021 - July 2021

Designed and deployed real-time analytics platform processing 2 billion events daily using distributed data processing frameworks

Implemented comprehensive CI/CD pipeline reducing deployment time from 45 minutes to 8 minutes

Led performance optimization initiatives resulting in 40% reduction in infrastructure costs across cloud environments

Managed on-call rotation and incident response for critical production systems, achieving 99.95% service availability

Senior Systems Architect

Capgemini

www.capgemini.com

Paris, France

June 2015 - December 2020

Designed enterprise-scale cloud infrastructure supporting 200+ concurrent microservices deployments

Architected disaster recovery and business continuity solutions for banking clients across EMEA region

Led team of 6 infrastructure engineers in implementing infrastructure-as-code practices and automation frameworks

Delivered critical infrastructure modernization project for major automotive manufacturer, reducing operational overhead by 35%

EDUCATION

Diplôme d'Ingénieur en Informatique

INSA Lyon (Institut National des Sciences Appliquées)

Lyon, France

2010

SKILLS

Cloud Platforms: AWS, Google Cloud Platform, Microsoft Azure

Container Orchestration: Docker, Kubernetes, Docker Swarm

Infrastructure as Code: Terraform, CloudFormation, Ansible

CI/CD Tools: Jenkins, GitLab CI/CD, GitHub Actions

Infrastructure Provisioning: ArgoCD, Helm, Puppet

Programming Languages: Java, Python, Go, Scala

Databases: PostgreSQL, MongoDB, Cassandra, Redis, Elasticsearch

Distributed Systems: Apache Kafka, RabbitMQ, Apache Spark

Monitoring and Observability: Prometheus, Grafana, Datadog, ELK Stack

Agile Methodologies: Scrum, Kanban, SAFe
