PROFESSIONAL SUMMARY

Results-driven Staff Engineer with 7 years of progressive experience in backend systems, cloud infrastructure, and distributed systems design. Proven track record of leading technical initiatives across multiple organizations in Stockholm. Strong communicator with expertise in designing scalable solutions and mentoring engineering teams. Passionate about solving complex technical challenges while maintaining code quality and system reliability.

WORK EXPERIENCE

Staff Engineer

Spotify AB, Stockholm, Sweden

www.spotify.com

January 2022 - Present

Architected and implemented microservices infrastructure supporting 50+ backend services handling millions of daily requests

Led migration of legacy payment processing systems to event-driven architecture, reducing transaction latency by 40%

Established code review standards and technical documentation practices across 8-person platform engineering team

Mentored 4 junior engineers on distributed systems design patterns and production incident response procedures

Senior Backend Engineer

DataStream Analytics Inc, Stockholm, Sweden

www.datastream-analytics.io

June 2019 - December 2021

Designed and deployed real-time data pipeline processing 2TB of analytics data daily using Apache Kafka and PostgreSQL

Implemented comprehensive monitoring and alerting system reducing mean time to detection by 60%

Optimized database query performance through index restructuring and query planning, improving application response times by 35%

Collaborated with data science team to build machine learning model serving infrastructure handling 100k predictions daily

Backend Engineer

King (King Digital Entertainment), Stockholm, Sweden

www.king.com

September 2017 - May 2019

Developed backend services for mobile game platform supporting 10 million monthly active users

Implemented caching layer using Redis reducing database load and improving API response times to under 100ms

Built comprehensive logging and analytics system to track player behavior and game performance metrics

Participated in on-call rotation and resolved production incidents with average response time of 15 minutes

EDUCATION

Master of Science in Computer Science

KTH Royal Institute of Technology, Stockholm, Sweden

2015 - 2017

Bachelor of Science in Computer Science

Uppsala University, Uppsala, Sweden

2012 - 2015

TECHNICAL SKILLS

Languages: Java, Python, Go, SQL, Bash

Databases: PostgreSQL, MySQL, Redis, DynamoDB

Cloud & Infrastructure: AWS (EC2, RDS, S3, Lambda), Google Cloud Platform, Docker, Linux

Distributed Systems: Apache Kafka, Message Queues, Event-Driven Architecture, Microservices

DevOps & Tools: Jenkins, GitLab CI/CD, Monitoring (Prometheus, Grafana, ELK Stack)

Advanced Technologies: Kubernetes, Terraform, ArgoCD, Service Mesh (Istio)

Software Design: System Design, API Design, Database Optimization, Performance Tuning

Soft Skills: Team Leadership, Technical Mentoring, Cross-functional Collaboration, Incident Response

LANGUAGES

Swedish - Native

English - Fluent

German - Basic
