PROFESSIONAL SUMMARY

Motivated Research Engineer with 2 years of experience in software development and data analysis. Passionate about exploring emerging technologies and contributing to innovative research projects. Strong foundation in Python, machine learning frameworks, and cloud technologies. Seeking to expand technical expertise while delivering tangible solutions to complex engineering challenges.

WORK EXPERIENCE

Research Engineer

Synapse Data Ltd

Leeds, United Kingdom

www.synapsedataltd.io

June 2023 - Present

Developed and maintained Python-based data processing pipelines for analyzing large-scale research datasets, improving query performance by 35 percent

Collaborated with cross-functional teams to design and implement machine learning models for predictive analytics using scikit-learn and TensorFlow

Conducted extensive code reviews and contributed to documentation standards, ensuring code quality and maintainability across the research department

Managed version control workflows using Git and participated in daily stand-ups to track project progress and technical blockers

Junior Software Engineer

Cognizant Technology Solutions

www.cognizant.com

Leeds, United Kingdom

March 2022 - May 2023

Built RESTful APIs using Flask and FastAPI frameworks to support internal research tools and data collection systems

Wrote comprehensive unit tests and integration tests achieving 82 percent code coverage using pytest and unittest frameworks

Optimized database queries and implemented caching mechanisms that reduced application response time by 28 percent

Assisted in cloud infrastructure setup and deployment using AWS services including EC2, S3, and RDS

Software Development Intern

BT Group

www.bt.com

Leeds, United Kingdom

July 2021 - February 2022

Contributed to backend development of customer-facing web applications using Python and JavaScript technologies

Participated in agile development cycles and assisted in deploying updates to production environments with minimal downtime

Debugged and resolved issues reported by QA teams, documenting solutions and contributing to internal knowledge base

Gained hands-on experience with Docker containerization and basic Kubernetes orchestration for microservices

EDUCATION

BSc Computer Science

University of Leeds

Leeds, United Kingdom

Graduated June 2021

Grade: 2:1 (Upper Second Class Honours)

Relevant Coursework: Data Structures, Machine Learning Fundamentals, Software Engineering, Databases, Web Development, Artificial Intelligence

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL, Bash

Frameworks and Libraries: Flask, FastAPI, Django, scikit-learn, TensorFlow, pandas, NumPy

Cloud Platforms: AWS (EC2, S3, RDS), basic GCP exposure

Databases: PostgreSQL, MySQL, MongoDB

Tools and Technologies: Git, Docker, Jenkins, Linux, Jupyter Notebook, VS Code

Data Analysis: Data visualization, statistical analysis, exploratory data analysis

PUBLIC REPOSITORIES

github.com/jrichardson92/sentiment-analysis-tool - Python NLP project using NLTK and TextBlob for social media sentiment classification

github.com/jrichardson92/weather-api-dashboard - Flask-based weather dashboard integrating OpenWeatherMap API with interactive frontend

github.com/jrichardson92/machine-learning-classifiers - Comparative analysis of classification algorithms including decision trees, random forests, and SVM

github.com/jrichardson92/data-pipeline-etl - Production-ready ETL pipeline for processing and transforming CSV datasets using Pandas and SQLAlchemy
