PROFESSIONAL SUMMARY

I am a junior backend engineer with 2 years of experience building scalable web applications and APIs. I enjoy solving complex problems and collaborating with teams to deliver robust software solutions. I'm passionate about clean code, continuous learning, and contributing to projects that make a real impact. Currently based in Amsterdam, I'm looking to grow my expertise in distributed systems and cloud technologies.

WORK EXPERIENCE

Backend Engineer

TechFlow Solutions

www.techflow.io

Amsterdam, Netherlands

March 2023 - Present

Developed and maintained RESTful APIs using Python and Django, serving 50+ concurrent users with average response times under 200ms

Implemented automated testing suite covering 85% of backend codebase, reducing production bugs by 40%

Optimized database queries and implemented Redis caching, improving application performance by 35%

Collaborated with frontend team and product managers to design and deliver 8 new features within sprint cycles

Junior Backend Developer

DataVise Analytics

www.datavise.co

Amsterdam, Netherlands

July 2022 - February 2023

Built microservices using Node.js and Express to process and analyze customer data streams

Created comprehensive API documentation using OpenAPI/Swagger standards for integration with third-party services

Participated in code reviews and implemented feedback from senior developers, improving code quality metrics

Assisted in migration of monolithic application to microservices architecture, reducing deployment time by 50%

Backend Developer Intern

WebSync Technologies

www.websync.net

Amsterdam, Netherlands

January 2022 - June 2022

Developed backend features for e-commerce platform using Python and Flask framework

Wrote unit tests and integration tests for critical business logic with pytest

Debugged and fixed production issues in real-time, maintaining 99.2% system uptime

Documented API endpoints and contributed to internal technical knowledge base

EDUCATION

Bachelor of Science in Computer Science

University of Amsterdam (UvA)

Amsterdam, Netherlands

Graduated: June 2021

GPA: 3.7/4.0

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, Java

Frameworks & Libraries: Django, Flask, Express.js, FastAPI

Databases: PostgreSQL, MongoDB, Redis

Tools & Platforms: Git, Docker, AWS, GitHub, Postman, Jenkins

Testing: pytest, Jest, unittest

APIs: RESTful API Design, JSON, XML

Other: Linux, CI/CD Pipelines, Agile/Scrum

GITHUB REPOSITORIES

1. python-ecommerce-api - Full-featured REST API for e-commerce platform built with Django and PostgreSQL
2. expense-tracker-service - Microservice for personal expense tracking using Node.js and MongoDB
3. task-queue-system - Distributed task queue implementation using Python and Celery
4. weather-data-processor - Real-time weather data processing service with caching and aggregation

CERTIFICATIONS & ACHIEVEMENTS

AWS Certified Cloud Practitioner (2023)

Docker Fundamentals Certificate (2022)

Participated in DutchJS Meetup Backend Development Group
