PROFESSIONAL SUMMARY

Experienced Staff Data Analyst with 14 years of progressive expertise in data strategy, business intelligence, and analytical problem-solving across multiple sectors. Known for translating complex datasets into actionable business insights and leading cross-functional teams to drive data-informed decision making. Strong track record of implementing robust analytics frameworks and mentoring junior analysts. Seeking to leverage deep technical knowledge and strategic thinking in a challenging role with forward-thinking organization.

WORK EXPERIENCE

Staff Data Analyst

DataVault Solutions

www.datavaultsolutions.io

Leeds, United Kingdom

March 2021 - Present

Led development and implementation of enterprise-wide analytics infrastructure supporting 200+ business users across 8 departments

Designed and maintained 45+ complex SQL queries and automated reporting dashboards that reduced manual reporting time by 35 hours per week

Mentored team of 4 junior data analysts on best practices in data quality assurance, statistical analysis, and visualization techniques

Established data governance framework and implemented validation protocols that improved data accuracy from 89% to 98.5%

Senior Data Analyst

Insight Analytics Group Ltd

www.insightanalyticsgroup.co.uk

Manchester, United Kingdom

July 2017 - February 2021

Conducted advanced statistical analysis on customer behavioral datasets containing 50+ million records using Python and R to identify revenue optimization opportunities worth GBP 2.3 million

Architected self-service analytics portal using Tableau and Power BI, enabling 150+ non-technical users to access insights without analyst intervention

Developed predictive models for customer churn that achieved 87% accuracy, directly informing retention strategy and reducing churn by 12%

Collaborated with product and marketing teams to define KPIs and measurement frameworks for tracking success of 5 major product initiatives

Data Analyst

TechCore Financial Services

www.techcore.net

Birmingham, United Kingdom

September 2010 - June 2017

Processed and analyzed daily transaction data across 8 financial products, identifying trends, anomalies, and reporting via weekly executive dashboards

Created 30+ Excel-based analytical models and automated reporting processes that eliminated 500+ hours of annual manual work

Supported regulatory compliance reporting by validating data quality and producing monthly reports for FCA submissions

Trained 12 business users on effective use of analytics tools and best practices in data interpretation and presentation
