PROFESSIONAL SUMMARY

Results-driven BI Analyst with 4 years of experience transforming complex data into actionable business insights. Proven track record of developing dashboards and analytical solutions that drive strategic decision-making across organizations. Skilled in data visualization, SQL optimization, and stakeholder communication. Looking to leverage expertise in a dynamic analytical role where I can contribute to data-driven growth initiatives.

WORK EXPERIENCE

BI Analyst

DataViz Solutions

Copenhagen, Denmark

datavizsolutions.io

September 2022 - Present

Directed analytics department of 52 employees, overseeing all reporting infrastructure and establishing KPI frameworks for executive leadership across 8 business units

Designed and maintained 40+ interactive Power BI dashboards serving 300+ daily active users with real-time sales, inventory, and financial metrics

Optimized SQL queries reducing dashboard load times by 68% through indexing strategies and query refactoring on datasets exceeding 500 million records

Mentored team of junior analysts on best practices for DAX formula development and conducted weekly training sessions on advanced analytics methodologies

Senior Data Analyst

TechInsight Analytics ApS

Aarhus, Denmark

techinsight.co

March 2021 - August 2022

Promoted to senior level after 6 months based on exceptional performance delivering advanced analytics solutions and business intelligence frameworks

Developed automated ETL processes using Python scripts to consolidate data from 12 disparate sources including SAP, Salesforce, and custom APIs

Created executive dashboards tracking financial KPIs, customer acquisition costs, and operational metrics with 95% accuracy rate

Implemented row-level security in Power BI ensuring 45 different business units could access only relevant departmental data while maintaining data integrity

Junior BI Developer

Insight Analytics Network

Copenhagen, Denmark

insightnet.io

June 2019 - February 2021

Built foundational SQL queries and basic tableau visualizations supporting business stakeholders with ad-hoc reporting requests and monthly performance analysis

Assisted in migrating legacy reporting systems from Excel-based solutions to cloud-based Power BI platform, reducing manual processing time by 40%

Conducted data quality assessments and validation testing across 15 data sources to ensure accuracy of downstream analytics and business intelligence outputs

Documented data lineage and created technical specifications for 20+ analytical processes supporting compliance and knowledge transfer across teams

EDUCATION

Master of Science in Business Analytics

Copenhagen Business School, Denmark

Graduated June 2019

Bachelor of Science in Information Technology

Aarhus University, Denmark

Graduated June 2017
