PROFESSIONAL SUMMARY

Results-driven Software Engineer with 2 years of commercial development experience in building scalable web applications and backend systems. Proficient in full-stack development with a strong foundation in Python, JavaScript, and cloud technologies. Passionate about writing clean, maintainable code and collaborating with cross-functional teams to deliver quality solutions. Looking to grow technical expertise and take on more complex architectural challenges.

WORK EXPERIENCE

Software Engineer

Vertex Digital Solutions Ltd

<https://www.vertexdigital.io>

Liverpool, United Kingdom

June 2023 - Present

Developed and maintained microservices architecture using Python and Django for internal data processing platform serving 15+ clients

Implemented REST APIs with comprehensive unit test coverage, achieving 85% code coverage using pytest and unittest frameworks

Collaborated with product managers and designers to translate requirements into technical specifications and delivered 3 major feature releases

Optimized database queries and implemented caching strategies using Redis, reducing API response times by 40%

Junior Full Stack Developer

NovaTech Communications Ltd

<https://www.novatechcomm.net>

Liverpool, United Kingdom

February 2022 - May 2023

Built responsive web applications using React and Node.js, delivering 8 client projects with positive feedback scores above 4.5/5

Debugged and resolved production issues in legacy codebases, maintaining 99.2% system uptime for critical services

Participated in code reviews and contributed to team documentation, improving onboarding process for new developers

Implemented automated testing pipelines using GitHub Actions, reducing manual testing effort by 30%

Software Developer Intern

Capgemini

<https://www.capgemini.com>

Manchester, United Kingdom

July 2021 - January 2022

Assisted in development of customer-facing web portal using HTML, CSS, and JavaScript for financial services client

Created SQL scripts and stored procedures for ETL processes, handling data migration for 500,000+ customer records

Documented technical specifications and process workflows, contributing to knowledge base used by 25-person development team

Supported senior developers in troubleshooting application issues and performing regression testing across multiple environments

EDUCATION

Bachelor of Science in Computer Science

University of Manchester

Manchester, United Kingdom

Graduated: June 2021

Grade: 2:1 (Upper Second Class Honours)

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML, CSS, Java

Frameworks and Libraries: Django, React, Node.js, Express.js, Flask

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud and DevOps: AWS (EC2, S3, Lambda), Docker, Kubernetes, GitHub Actions

Tools and Platforms: Git, JIRA, Jenkins, VS Code, Postman, Linux

Methodologies: Agile, Scrum, Test-Driven Development

GITHUB REPOSITORIES

github.com/jamesmitchell92/task-management-api - Python Django REST API with PostgreSQL and comprehensive test suite

github.com/jamesmitchell92/weather-dashboard - React web application consuming OpenWeatherMap API with real-time data visualization

github.com/jamesmitchell92/ecommerce-platform - Full-stack Node.js and React e-commerce application with Stripe payment integration

github.com/jamesmitchell92/data-processing-tool - Python CLI tool for batch processing and CSV file analysis with logging functionality
