PROFESSIONAL SUMMARY

Passionate software engineer with 4 years of experience building scalable web applications and leading cross-functional development teams. I've transitioned from backend development to full-stack engineering while maintaining strong fundamentals in system design and cloud architecture. Known for mentoring junior developers and delivering high-impact projects on tight deadlines. Currently seeking new opportunities to apply my expertise in modern tech stacks.

WORK EXPERIENCE

Engineering Manager

TechVision Solutions (Previously known as CloudNova Innovations)

<https://www.techvisionsolutions.com>

Lisbon, Portugal

March 2023 - Present

Managed and mentored a team of 24 software engineers across three product lines, overseeing roadmap planning and quarterly OKRs

Architected the complete migration from monolithic application to microservices architecture, reducing deployment time by 65%

Directed department-level strategic initiatives including budget allocation of 2.8 million euros and vendor partnerships with major cloud providers

Led quarterly town halls with 200+ stakeholders and presented technical strategy to C-level executives

Senior Software Engineer

Unbabel

<https://www.unbabel.com>

Lisbon, Portugal

November 2021 - February 2023

Designed and implemented distributed caching layer using Redis that improved API response time by 58% for 5 million daily active users

Led the backend infrastructure redesign project, resulting in 40% reduction in cloud costs and improved system reliability to 99.99% uptime

Mentored 8 junior engineers on microservices architecture and code quality standards

Developed automated testing framework that increased code coverage from 42% to 89% in 6 months

Junior Developer

DataFlow Systems

<https://www.dataflowsystems.io>

Lisbon, Portugal

June 2020 - October 2021

Developed REST APIs using Python and Django that processed over 50 million records monthly for financial analytics clients

Implemented continuous integration and deployment pipelines reducing release cycles from weekly to daily deployments

Built real-time monitoring dashboard using Grafana and Prometheus for production system observability

Collaborated with product team to deliver 12 features per sprint while maintaining zero critical production incidents

EDUCATION

Bachelor of Science in Computer Science

Instituto Superior Técnico, University of Lisbon

Lisbon, Portugal

2016 - 2020

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, Java, SQL

Backend Technologies: Django, FastAPI, Node.js, Spring Boot, PostgreSQL

Frontend Technologies: React, Vue.js, HTML5, CSS3

DevOps and Cloud: AWS, Docker, Kubernetes, CI/CD pipelines, Terraform, GitHub Actions

Databases: PostgreSQL, MongoDB, Redis, Elasticsearch

Other Skills: Microservices Architecture, System Design, RESTful APIs, GraphQL, Git, Agile Methodologies

GITHUB REPOSITORIES

<https://github.com/joaomiguelsantos/python-redis-cache-layer>

Repository containing optimized Redis caching implementation for high-traffic applications with benchmarking tools and documentation.

<https://github.com/joaomiguelsantos/kubernetes-deployment-automation>

Comprehensive Kubernetes manifests and Helm charts for deploying containerized applications with monitoring and auto-scaling configurations.

<https://github.com/joaomiguelsantos/fastapi-async-framework>

Production-ready FastAPI boilerplate with async/await patterns, dependency injection, and comprehensive API documentation.

<https://github.com/joaomiguelsantos/react-dashboard-analytics>

Real-time analytics dashboard built with React and TypeScript featuring interactive charts, data filtering, and export capabilities.
