PROFESSIONAL SUMMARY

Accomplished Principal Engineer with 10 years of progressive experience designing and implementing large-scale distributed systems and cloud infrastructure solutions. Proven track record of leading cross-functional technical teams, driving architectural decisions, and delivering mission-critical platforms that support millions of transactions daily. Expertise spans full-stack cloud engineering, microservices architecture, and DevOps practices. Seeking challenging opportunities to architect innovative solutions and mentor high-performing engineering organizations.

WORK EXPERIENCE

Principal Engineer

Synapse Data Ltd

www.synapsedata.io

Paris, France

March 2022 - Present

Led architectural design and implementation of real-time data processing platform handling 500K events per second across multiple geographic regions

Established and maintained cloud infrastructure standards reducing operational costs by 32 percent while improving system reliability to 99.99 percent uptime

Mentored team of 8 senior engineers on best practices in system design, code quality, and production operations

Directed migration of legacy monolithic application to microservices architecture, completing project 2 months ahead of schedule and reducing deployment time from 4 hours to 12 minutes

Senior Principal Engineer

Orange Business Services

www.orange-business.com

Paris, France

July 2017 - February 2022

Designed and deployed enterprise cloud infrastructure supporting 150 plus enterprise customers with strict regulatory compliance requirements

Led development of proprietary API gateway handling 50 million requests daily with 99.95 percent availability guarantee

Established continuous integration and continuous deployment pipeline reducing time to market for new features from 6 weeks to 10 days

Architected security framework implementing zero-trust architecture principles across all production environments and customer deployments

Senior Software Engineer

Capgemini

www.capgemini.com

Paris, France

June 2014 - June 2017

Developed core components of distributed transaction management system processing 100 million transactions monthly for major financial institutions

Implemented monitoring and observability solutions using industry-standard tools reducing mean time to resolution by 45 percent

Collaborated with product management and stakeholders to define technical roadmap and prioritize engineering efforts for Q1 through Q4 planning cycles

Mentored 5 junior engineers and established code review practices improving code quality metrics across the organization

EDUCATION

Master of Science in Computer Science

Université Pierre et Marie Curie (Sorbonne University)

Paris, France

2012 - 2014

SKILLS

Backend Development: Java, Python, Go, C++

Cloud Platforms: AWS, Google Cloud Platform, Microsoft Azure

Containerization: Docker, container orchestration, image registry management

Infrastructure as Code: CloudFormation, Terraform, ArgoCD

Message Queues: Apache Kafka, RabbitMQ, AWS SQS

Databases: PostgreSQL, MongoDB, Redis, Cassandra, DynamoDB

API Design: REST, gRPC, GraphQL

Kubernetes: Advanced cluster management, custom resource definitions, operators

Version Control: Git, GitHub Enterprise

Monitoring and Logging: Prometheus, ELK Stack, Datadog, New Relic

Agile Methodologies: Scrum, Kanban, SAFe

Leadership: Team mentoring, technical strategy, cross-functional collaboration

LANGUAGES

French: Native

English: Fluent

German: Professional Working Proficiency
