PROFESSIONAL SUMMARY

Results-driven software engineer with 5 years of experience designing and implementing scalable backend systems. Passionate about clean code and optimizing system performance. Strong background in cloud infrastructure and microservices architecture. Seeking to leverage technical expertise in a collaborative environment.

WORK EXPERIENCE

Principal Engineer

TechVision Labs

Amsterdam, Netherlands

techvision.io

January 2023 - Present

Architected and led the migration of monolithic application to microservices reducing deployment time by 65 percent

Managed and mentored a team of 8 senior engineers across multiple product lines and technical domains

Designed event-driven infrastructure handling 2 million daily transactions with 99.99 percent uptime

Directed strategic technical initiatives that generated 3.2 million euros in cost savings annually

Senior Backend Engineer

DataStream Solutions

Utrecht, Netherlands

datastream.co

July 2021 - December 2022

Developed REST APIs serving 500k daily active users using Node.js and Express framework

Implemented comprehensive monitoring and alerting system using Prometheus and Grafana reducing incident response time by 40 percent

Collaborated with DevOps team to containerize legacy applications using Docker and Kubernetes

Optimized database queries resulting in 35 percent improvement in API response times

Junior Software Developer

StartupHub Academy

Amsterdam, Netherlands

startuphubacademy.net

March 2019 - June 2021

Built full-stack features for e-commerce platform using React and Python Django

Participated in daily standup meetings and contributed to sprint planning activities

Wrote unit and integration tests achieving 78 percent code coverage

Debugged production issues and deployed hotfixes within SLA requirements

EDUCATION

Bachelor of Science in Computer Science

University of Amsterdam

Amsterdam, Netherlands

Graduated: June 2019

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, SQL, TypeScript

Frameworks and Libraries: Node.js, Express, React, Django, FastAPI

Databases: PostgreSQL, MongoDB, Redis, Elasticsearch

Cloud and DevOps: AWS, Docker, Kubernetes, CI/CD pipelines, GitHub Actions

Tools and Platforms: Git, Linux, Jira, Confluence, REST APIs

Specializations: Microservices architecture, System design, Database optimization, API development
