PROFESSIONAL SUMMARY

I'm a Full Stack Engineer with 2 years of hands-on experience building web applications using modern JavaScript frameworks and backend technologies. I enjoy solving technical problems and writing clean, maintainable code. Currently focused on expanding my expertise in cloud infrastructure and improving my backend architecture skills. I'm eager to contribute to meaningful projects while continuing to learn from experienced developers in a collaborative team environment.

TECHNICAL SKILLS

Frontend: JavaScript, React, Vue.js, HTML5, CSS3, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, Python, Django

Databases: PostgreSQL, MongoDB, MySQL

Tools and Technologies: Git, Docker, REST APIs, Postman, npm, Webpack

Cloud and Deployment: AWS (EC2, S3), Heroku, Netlify

Other: Agile/Scrum, JIRA, Linux, RESTful API Design

WORK EXPERIENCE

Junior Full Stack Developer

TechVision Labs (Previously known as Digital Nexus Solutions) - www.techvisionlabs.com

Birmingham, United Kingdom

September 2022 - Present

Developed and maintained full stack web applications using React and Node.js for various client projects

Implemented responsive user interfaces and integrated backend APIs to deliver seamless user experiences

Collaborated with senior developers and UX designers to translate requirements into functional features

Participated in code reviews, daily stand-ups, and sprint planning to maintain project momentum and code quality

Full Stack Developer

Velocity Digital - www.velocitydigital.io

Birmingham, United Kingdom

March 2022 - August 2022

Built RESTful APIs using Express.js and MongoDB for e-commerce platforms serving 5000+ monthly users

Created responsive frontend components with React and Tailwind CSS following design specifications

Deployed applications to AWS and Heroku, managing databases and monitoring application performance

Debugged production issues and implemented bug fixes within SLAs, reducing critical issues by 30%

Junior Web Developer

Bright Pixel Studios - www.brightpixelstudios.net

Coventry, United Kingdom

June 2021 - February 2022

Developed static and dynamic websites using HTML5, CSS3, and vanilla JavaScript for small business clients

Assisted in migrating legacy PHP applications to modern Node.js stack with mentorship from senior engineers

Implemented client-side form validation and integrated third-party payment APIs for checkout systems

Maintained version control using Git and documented code changes to support team collaboration

EDUCATION

Bachelor of Science in Computer Science

Aston University, Birmingham, United Kingdom

Graduated: June 2021

Grade: 2:1 (Upper Second Class Honours)

GITHUB REPOSITORIES

github.com/jamesmitchell92/e-commerce-platform - Full stack e-commerce application built with React and Node.js including product catalog, shopping cart, and payment integration

github.com/jamesmitchell92/task-management-app - Task management web application with user authentication, real-time updates, and PostgreSQL backend using Express.js

github.com/jamesmitchell92/weather-dashboard - Weather dashboard using React and OpenWeather API with responsive design and location-based features

github.com/jamesmitchell92/blog-cms - Lightweight CMS for managing blog posts with Django backend and Vue.js frontend

ADDITIONAL INFORMATION

Certifications: AWS Certified Cloud Practitioner (in progress)

Languages: English (Native), Romanian (Basic)

Interests: Open source contribution, web performance optimization, learning Go
