PROFESSIONAL SUMMARY

Results-driven Staff Engineer with 10 years of progressive experience in cloud infrastructure, data engineering, and distributed systems. Proven track record of architecting scalable solutions for high-traffic platforms and mentoring technical teams. Passionate about solving complex engineering challenges and driving organizational transformation through technological innovation. Currently seeking opportunities to leverage deep technical expertise in leading strategic initiatives.

WORK EXPERIENCE

Staff Engineer

TechVenture Solutions Ltd (Previously known as DataFlow Innovations)

www.techventuresolutions.io

Cambridge, United Kingdom

June 2022 - Present

Architected and deployed a microservices infrastructure serving 5 million daily active users using Kubernetes and Terraform, resulting in 40% reduction in operational overhead

Designed and implemented real-time data pipeline using dbt, reducing ETL processing time from 8 hours to 45 minutes and improving data freshness for analytics teams

Led cross-functional team of 12 engineers across backend, DevOps, and data services, establishing coding standards and architectural patterns adopted across the organization

Established comprehensive observability strategy using Prometheus, Grafana, and ELK stack, improving incident response time by 65% and reducing MTTR to under 15 minutes

Senior Software Engineer

Nexus Financial Systems

www.nexus.co.uk

London, United Kingdom

March 2019 - May 2022

Developed and maintained critical payment processing systems handling 2 billion GBP annually in transactions with 99.99% uptime SLA

Implemented machine learning pipeline using LangChain for fraud detection, achieving 94% accuracy and preventing estimated 8 million GBP in fraudulent transactions

Managed deployment automation using GitHub Actions, reducing deployment time from 45 minutes to 8 minutes and enabling 20+ releases per week

Mentored team of 8 junior engineers, conducting weekly code reviews and establishing best practices for testing and documentation

Junior Software Engineer

Innovate Core Technologies

www.innovatecoretech.net

Cambridge, United Kingdom

September 2014 - February 2019

Led architectural design and implementation of customer-facing API serving 500,000 requests per day, managing technical strategy and business alignment with C-level stakeholders

Developed ETL pipelines using Python and Apache Spark for processing petabyte-scale datasets, optimizing query performance by 55% through advanced indexing strategies

Deployed and managed containerized applications using Docker and Docker Swarm, establishing infrastructure-as-code practices and reducing manual configuration errors by 78%

Spearheaded team of 18 backend engineers across multiple product lines, establishing recruiting processes, conducting performance reviews, and directing technical roadmap priorities

EDUCATION

MSc Computer Science

University of Cambridge

Cambridge, United Kingdom

2012 - 2014

BSc Computer Science with First-Class Honours

University of Edinburgh

Edinburgh, United Kingdom

2008 - 2012

TECHNICAL SKILLS

Languages: Python, Go, Java, SQL, Bash, TypeScript

Cloud Platforms: AWS (EC2, S3, Lambda, RDS), Google Cloud Platform, Azure

Data Technologies: Apache Spark, Apache Kafka, dbt, Snowflake, PostgreSQL, BigQuery

DevOps and Infrastructure: Kubernetes, Docker, Terraform, Ansible, Jenkins, GitHub Actions

Monitoring and Observability: Prometheus, Grafana, DataDog, ELK Stack, New Relic

Frameworks and Tools: FastAPI, Spring Boot, gRPC, Protocol Buffers, LangChain

Architecture Patterns: Microservices, Event-Driven Architecture, CQRS, Distributed Systems

CERTIFICATIONS

AWS Certified Solutions Architect Professional, 2021

Kubernetes Application Developer Certification, 2020
