PROFESSIONAL SUMMARY

Results-driven DevOps Engineer with 2 years of hands-on experience in cloud infrastructure and CI/CD pipeline development. Proven ability to automate deployment processes and maintain highly available systems. Seeking to expand expertise in containerisation and infrastructure as code while contributing to challenging projects in a collaborative environment.

WORK EXPERIENCE

DevOps Engineer

TechVelocity Solutions Ltd

Liverpool, United Kingdom

www.techvelocity.io

January 2023 - Present

Designed and implemented CI/CD pipelines using Jenkins and GitLab CI, reducing deployment time by 40 percent for microservices

Managed AWS EC2 instances and RDS databases, ensuring 99.5 percent uptime across production environments

Implemented Infrastructure as Code using Terraform, enabling reproducible and version-controlled infrastructure deployments

Collaborated with development teams to troubleshoot application performance issues and optimise containerised environments

Cloud Infrastructure Specialist

CloudBase Systems

Liverpool, United Kingdom

cloudbase.co.uk

September 2021 - December 2022

Provisioned and maintained Docker containerised applications across Kubernetes clusters, serving 50 plus microservices in production

Automated server monitoring and alerting using Prometheus and Grafana, improving incident response time by 35 percent

Implemented backup and disaster recovery procedures using AWS S3 and automated snapshots, ensuring RPO of less than 4 hours

Documented infrastructure architecture and runbooks for knowledge transfer, reducing onboarding time for new team members

Junior Systems Administrator

DataCore Networks

Liverpool, United Kingdom

www.datacore-networks.net

June 2021 - October 2022

Supported Linux server infrastructure across development, staging, and production environments serving internal and client systems

Assisted in troubleshooting network connectivity issues and performed regular security patching for 150 plus servers

Configured and maintained automated backup solutions using Bacula, achieving 98 percent successful backup completion rates

Created monitoring dashboards using basic shell scripts and log aggregation to identify performance bottlenecks

EDUCATION

Bachelor of Science in Computer Science

University of Liverpool

Liverpool, United Kingdom

Graduated: June 2021

Grade: 2:1

TECHNICAL SKILLS

Cloud Platforms: AWS, Azure basics

Containerisation: Docker, Kubernetes, Docker Compose

CI/CD Tools: Jenkins, GitLab CI, GitHub Actions

Infrastructure as Code: Terraform, Ansible

Monitoring and Logging: Prometheus, Grafana, ELK Stack

Scripting Languages: Bash, Python, PowerShell

Version Control: Git, GitHub, GitLab

Databases: MySQL, PostgreSQL, Redis

Web Servers: Nginx, Apache

Operating Systems: Linux RHEL, Ubuntu, Windows Server

PUBLIC REPOSITORIES

github.com/jamesmitchell92/terraform-aws-vpc-setup

Terraform configuration for automated VPC setup with public and private subnets, NAT gateways, and security groups

github.com/jamesmitchell92/docker-compose-wordpress

Multi-container Docker Compose setup for WordPress with Nginx reverse proxy and MySQL database

github.com/jamesmitchell92/kubernetes-deployment-scripts

Kubernetes manifests and Helm charts for deploying microservices with auto-scaling and health checks

github.com/jamesmitchell92/bash-monitoring-scripts

Collection of Bash scripts for server health checks, disk usage monitoring, and automated alerting

CERTIFICATIONS

AWS Certified Cloud Practitioner

Issued: March 2023

Docker Certified Associate preparation in progress
