PROFESSIONAL SUMMARY

I'm a Business Intelligence Analyst with 12 years of hands-on experience building data solutions for retail and financial services organisations. I've spent the last six years in senior analyst roles where I've led small teams, mentored junior analysts, and delivered complex reporting infrastructure that directly improved decision-making across departments. I enjoy solving tricky data problems and have a particular interest in optimising warehouse architecture.

WORK EXPERIENCE

Senior BI Analyst

DataVault Solutions

www.datavault.io

Manchester, United Kingdom

March 2021 - Present

Designed and implemented a new enterprise data warehouse serving 200+ internal users, reducing query times by 65% and eliminating legacy reporting bottlenecks.

Led the migration of 45 critical reports from legacy systems to Tableau, training end-users and reducing support tickets by 40%.

Managed a team of two junior analysts, establishing code review processes and mentoring them through three successful projects.

Established automated data quality checks using SQL Server Integration Services, catching data issues before they reached stakeholders.

BI Analyst

FinServe Analytics Ltd

www.finserve.co.uk

London, United Kingdom

June 2017 - February 2021

Developed 80+ interactive dashboards in Tableau and Power BI used by executive teams and business unit managers for monthly strategy reviews.

Created ETL pipelines processing 2TB+ of daily transaction data using Python and SQL, ensuring 99.8% data accuracy across all reports.

Collaborated with Finance and Operations teams to implement a new cost allocation model, providing department-level insights that identified £1.2m in savings opportunities.

Documented data lineage and business logic for 120 reports, improving audit compliance and enabling other analysts to maintain systems independently.

BI Developer

Insight Commerce Group

www.insightcommerce.net

Manchester, United Kingdom

January 2012 - May 2017

Built and maintained dimensional data models supporting retail performance analysis across 150+ store locations.

Wrote complex SQL queries and stored procedures for monthly and ad-hoc reporting requests from commercial teams.

Implemented automated email-based reporting using SQL Server Reporting Services, delivering 35 regular reports to stakeholders.

Supported system migrations and database upgrades, ensuring zero downtime for reporting infrastructure.

EDUCATION

Bachelor of Science in Computer Science

University of Manchester

Manchester, United Kingdom

2008 - 2011

TECHNICAL SKILLS

Data Warehousing: Dimensional modelling, star schemas, slowly changing dimensions, data vault architecture

Business Intelligence Tools: Tableau, Power BI, SQL Server Reporting Services, QlikView

Databases: SQL Server, PostgreSQL, MySQL

Programming Languages: SQL, Python, T-SQL, VBA

ETL: SSIS, Talend, Python scripting, data pipeline development

Cloud Platforms: Azure Data Services, AWS Redshift basics

Reporting: Dashboard design, KPI development, data storytelling, ad-hoc analysis

Other: Excel advanced functions, Git version control, data quality frameworks, agile methodologies
