PROFESSIONAL SUMMARY

I'm a Staff DevOps Engineer with 12 years of hands-on experience building and maintaining infrastructure at scale. I've spent the last several years leading platform reliability initiatives for fintech and SaaS companies, focusing on automating complex deployments and reducing mean time to recovery. I'm particularly interested in mentoring junior engineers and architecting solutions that make the entire organisation more efficient, not just the infrastructure team.

WORK EXPERIENCE

Staff DevOps Engineer

Quantum Financial Systems

Cambridge, United Kingdom

www.quantumfinsys.io

March 2021 - Present

Led the migration of legacy monolithic applications to Kubernetes, reducing deployment time from 45 minutes to 8 minutes across 15 microservices.

Designed and implemented a multi-region disaster recovery strategy using Terraform and AWS, achieving 99.99% uptime SLA with automated failover.

Mentored a team of 4 junior DevOps engineers, establishing best practices for infrastructure-as-code and conducting weekly technical reviews.

Established comprehensive observability platform using Prometheus, Grafana, and ELK stack, reducing incident detection time by 60%.

Senior DevOps Engineer

NextGen Platform Services

London, United Kingdom

www.nextgenplatform.net

July 2017 - February 2021

Architected and deployed CI/CD pipelines using Jenkins and GitLab, supporting 50+ development teams across multiple product lines.

Implemented Infrastructure as Code practices using Ansible and CloudFormation, reducing manual configuration tasks by 75%.

Led on-call rotation improvements that decreased average page response time from 15 minutes to 4 minutes through better alerting rules.

Managed AWS infrastructure including EC2, RDS, S3, and Lambda, optimising costs by 40% through reserved instances and spot pricing strategies.

DevOps Engineer

TechCore Solutions Ltd

Cambridge, United Kingdom

www.techcoresolutions.co.uk

September 2012 - June 2017

Built and maintained continuous integration infrastructure using Jenkins, supporting deployments for 20+ projects across Java and Python stacks.

Implemented configuration management using Puppet and later Chef, managing 200+ servers across development, staging, and production environments.

Established monitoring and alerting infrastructure using Nagios and later Datadog, improving mean time to detection of infrastructure issues.

Managed Linux server administration including security patches, backups, and capacity planning across on-premises and AWS infrastructure.

EDUCATION

BSc Computer Science

University of Cambridge

Cambridge, United Kingdom

2008 - 2011

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, RDS, S3, Lambda, CloudFormation), Azure, Google Cloud Platform

Container Orchestration: Kubernetes, Docker, Docker Compose

Infrastructure as Code: Terraform, Ansible, CloudFormation, Helm

CI/CD Tools: Jenkins, GitLab CI, GitHub Actions, ArgoCD

Monitoring and Observability: Prometheus, Grafana, ELK Stack, Datadog, New Relic

Configuration Management: Ansible, Chef, Puppet

Programming Languages: Python, Bash, Go

Version Control: Git, GitHub, GitLab

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB

Networking: VPC, Security Groups, Load Balancers, DNS, CDN

Operating Systems: Linux (Ubuntu, CentOS, Amazon Linux), Windows Server

Incident Management: PagerDuty, OpsGenie, Incident response procedures

Agile Methodologies: Scrum, Kanban, Sprint planning
