PROFESSIONAL SUMMARY

I'm a backend-focused software engineer with three years of experience building web applications and APIs at different scales. I've spent most of my career working with Python and JavaScript, and I'm comfortable moving between frontend and infrastructure tasks when needed. I enjoy solving performance problems and have shipped features that directly impacted user experience for thousands of people.

WORK EXPERIENCE

Software Engineer

TechFlow Solutions

<https://techflow.io>

Madrid, Spain

March 2023 - Present

Developed and maintained REST APIs serving 2 million requests daily using Python with Django and PostgreSQL, reducing average response time from 450ms to 180ms through query optimization and caching strategies.

Implemented real-time notification system using WebSockets and Redis, handling concurrent connections from 50,000+ active users without service degradation.

Led code reviews for a team of four junior developers and contributed to establishing coding standards that reduced production bugs by 35% over six months.

Designed database schema for new microservice handling payment processing, ensuring ACID compliance and implementing proper indexing that improved query performance by 60%.

Backend Developer

Digital Agency Nexus

<https://nexusdigital.co>

Madrid, Spain

July 2022 - February 2023

Built and deployed five customer-facing web applications using Node.js and Express, integrating third-party APIs including Stripe, SendGrid, and AWS services.

Optimized Docker containerization and Kubernetes deployments, reducing container startup time from 45 seconds to 12 seconds and cutting infrastructure costs by 22%.

Implemented comprehensive logging and monitoring using ELK stack and created dashboards that helped identify and fix performance bottlenecks across services.

Collaborated with frontend team to define API contracts using OpenAPI specification and provided technical documentation that reduced integration time by 40%.

Junior Full Stack Developer

StartUp Hub Madrid

<https://startupkubemadrid.net>

Madrid, Spain

September 2021 - June 2022

Developed full-stack features for a project management SaaS platform using React for frontend and Flask for backend, directly contributing to onboarding experience improvements.

Fixed bugs and implemented requested features from product team, handling an average of 15 tickets per two-week sprint with consistent on-time delivery.

Created unit tests and integration tests for critical business logic, achieving 75% code coverage and preventing several regressions in production.

Participated in daily standups, sprint planning, and retrospectives while learning agile development practices and understanding how engineering connects to business goals.

EDUCATION

Bachelor of Science in Computer Science

Universidad Autónoma de Madrid

Madrid, Spain

2018 - 2021

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML5, CSS3

Backend Frameworks: Django, Flask, Express.js, FastAPI

Frontend: React, Vue.js, Bootstrap

Databases: PostgreSQL, MongoDB, Redis

Tools and Platforms: Docker, Kubernetes, Git, GitHub Actions, Jenkins

Cloud Services: AWS (EC2, S3, RDS, Lambda), Google Cloud

APIs and Protocols: REST, WebSockets, GraphQL basics

Testing: Pytest, Jest, Mocha

GITHUB REPOSITORIES

<https://github.com/carlomartinez/flask-blog-api> - Blog platform API built with Flask and PostgreSQL, includes authentication and markdown support

<https://github.com/carlomartinez/react-task-dashboard> - Task management dashboard in React with drag-and-drop functionality

<https://github.com/carlomartinez/django-ecommerce> - E-commerce backend with Stripe integration and inventory management
