PROFESSIONAL SUMMARY

I'm a DevOps engineer based in Berlin with hands-on experience setting up and maintaining cloud infrastructure. I've spent the last year working with containerized applications and CI/CD pipelines, learning how to automate deployment processes and reduce manual overhead. I'm comfortable troubleshooting Linux systems and have built automation scripts to improve team workflows. I'm looking to deepen my expertise in Kubernetes and infrastructure-as-code while contributing meaningfully to production systems.

TECHNICAL SKILLS

Cloud Platforms: AWS EC2, S3, RDS, DigitalOcean

Containerization: Docker, Docker Compose

Orchestration: Kubernetes basics, Helm

CI/CD Tools: Jenkins, GitHub Actions, GitLab CI

Infrastructure as Code: Terraform, Ansible

Monitoring: Prometheus, Grafana, ELK Stack

Version Control: Git, GitHub, GitLab

Programming: Python, Bash scripting

Databases: PostgreSQL, MySQL

Operating Systems: Linux Ubuntu, CentOS, Debian

Web Servers: Nginx, Apache

WORK EXPERIENCE

DevOps Engineer

TechFlow Solutions

www.techflow-solutions.io

Berlin, Germany

June 2023 - Present

Automated deployment processes for microservices using GitHub Actions and Docker, reducing manual deployment time by approximately 40 percent across three development teams.

Designed and implemented monitoring dashboards with Prometheus and Grafana to track application performance metrics and infrastructure health, enabling faster incident response.

Managed AWS infrastructure including EC2 instances, RDS databases, and S3 buckets, applying security best practices and cost optimization strategies that reduced monthly cloud spending by 15 percent.

Documented infrastructure architecture and created runbooks for common operational tasks, improving team knowledge sharing and reducing onboarding time for new team members.

System Administrator

Digital Pioneers GmbH

www.digitalpioneers.de

Berlin, Germany

March 2023 - May 2023

Supported Linux server maintenance and updates across 25 production and staging environments using Ansible playbooks for configuration management.

Troubleshoot network connectivity issues and database performance problems, coordinating with development teams to identify root causes and implement solutions.

Implemented automated backup procedures for critical databases and verified restore procedures monthly to ensure business continuity.

Assisted in planning the migration of legacy applications from on-premise servers to AWS cloud infrastructure, documenting requirements and testing environments.

Junior DevOps Apprentice

CloudStart Ventures

cloudstart.io

Berlin, Germany

January 2023 - February 2023

Containerized a legacy monolithic application using Docker, creating Dockerfile and Docker Compose configurations for local development environments.

Learned and practiced Kubernetes fundamentals by deploying test applications to a small development cluster and managing pods and services.

Created Bash scripts to automate routine system administration tasks including log rotation, user account provisioning, and backup verification.

Participated in sprint planning meetings and contributed to technical discussions on infrastructure improvements and deployment strategy optimization.

EDUCATION

Bachelor of Science in Computer Science

Technical University of Berlin (Technische Universität Berlin)

Berlin, Germany

Graduation: July 2022

OPEN SOURCE AND PROJECTS

kubernetes-nginx-helm-chart: Helm chart for deploying Nginx on Kubernetes clusters with custom configuration options and ingress setup. 15 stars on GitHub.

docker-python-microservice: Example Python microservice with Docker and docker-compose setup for local development and testing environments.

terraform-aws-deployment: Terraform modules for provisioning basic AWS infrastructure including VPC, security groups, and EC2 instances with documentation.

ansible-linux-hardening: Ansible playbook collection for hardening Linux servers with security patches, firewall rules, and SSH configuration.

CERTIFICATIONS

AWS Certified Cloud Practitioner (Candidate)

Linux Essentials Certification - LPI (Completed December 2022)
