PROFESSIONAL SUMMARY

I'm a data analyst with 6 years of experience turning raw data into actionable insights across finance and tech sectors. I specialise in building dashboards, statistical analysis, and helping non-technical stakeholders understand complex datasets. I've moved from London to Bristol recently and I'm drawn to roles where I can help companies make better decisions through data storytelling rather than just presenting numbers.

WORK EXPERIENCE

Senior Data Analyst

DataVault Solutions

www.datavaultsolutions.io

Bristol, United Kingdom

March 2022 - Present

Designed and maintained 15+ Tableau dashboards used daily by the executive team to track business metrics and revenue trends, reducing reporting time by 8 hours per week

Conducted statistical analysis on customer behaviour data using Python and SQL to identify retention patterns, resulting in a targeted campaign that improved customer lifetime value by 12%

Built automated data pipelines using Python scripts and SQL Server to consolidate data from 6 different sources, enabling real-time reporting instead of monthly snapshots

Mentored 2 junior analysts on SQL optimization techniques and best practices for data visualisation, helping both achieve significant improvements in their technical capabilities

Data Analyst

FinanceCore Ltd

www.financecoreuk.co.uk

London, United Kingdom

July 2019 - February 2022

Created bespoke Excel models and Power BI dashboards for 8 key stakeholders across risk and compliance departments to monitor regulatory KPIs and trading exposure

Performed variance analysis on monthly financial results against budgets and forecasts, producing detailed reports that identified cost overruns early enough for corrective action

Cleaned and validated large datasets containing transaction records and wrote SQL queries to extract data for ad-hoc analysis, improving data quality by approximately 15%

Collaborated with the IT department to establish data governance standards and documentation processes that reduced errors in monthly reporting cycles

Junior Data Analyst

Clarity Insights

www.clarityinsights.net

London, United Kingdom

September 2018 - June 2019

Extracted data from various internal databases and external APIs using SQL and created summary reports that helped marketing and product teams understand user engagement patterns

Assisted in building an automated monthly reporting system using Excel VBA that reduced manual effort by 20 hours per month and improved consistency across departments

Performed exploratory data analysis to investigate customer churn and presented findings to senior management with visualisations that led to a retention strategy update

Supported the analytics team in testing new tools and methodologies, including an initial evaluation of Tableau that eventually became our primary visualisation platform

EDUCATION

MSc Data Science

University of Bristol

Bristol, United Kingdom

Graduated: September 2018

BSc Statistics

University of Manchester

Manchester, United Kingdom

Graduated: June 2017

TECHNICAL SKILLS
