Dublin, Ireland

PROFESSIONAL SUMMARY

Experienced Full Stack Engineer with 12 years of hands-on development across fintech, e-commerce, and SaaS platforms. Strong track record building scalable systems from ground up and leading technical initiatives across frontend and backend domains. Based in Dublin, I've worked with teams ranging from early-stage startups to established enterprises, delivering robust solutions that handle millions of transactions daily. Passionate about clean architecture, mentoring junior developers, and solving complex performance challenges.

WORK EXPERIENCE

Senior Full Stack Engineer

Fintech Solutions Ireland

Dublin, Ireland

fintech-solutions.io

January 2021 - Present

Architected and deployed microservices-based payment processing platform handling 2 million transactions monthly across EU markets

Led migration of legacy monolithic application to containerized infrastructure using Docker and Kubernetes, reducing deployment time by 65 percent

Mentored team of 5 junior developers on backend design patterns, code review processes, and testing methodologies

Implemented comprehensive monitoring and logging system using ELK stack, reducing mean time to resolution for production incidents by 40 percent

Full Stack Engineer

Digital Commerce Group

Dublin, Ireland

digitalcommercegroup.co

June 2017 - December 2020

Developed and maintained e-commerce platform serving 50,000 daily active users with React frontend and Node.js backend

Optimized database queries and implemented caching strategies that improved page load times by 55 percent

Built real-time inventory management system using WebSockets and Redis for 15 warehouse locations across Ireland and UK

Established automated testing framework achieving 78 percent code coverage and reducing production bugs by 48 percent

Software Developer

Insight Analytics Ltd

Dublin, Ireland

insight-analytics.net

August 2012 - May 2017

Built data visualization dashboard using D3.js and Vue.js for financial analysis clients processing 500,000 data points daily

Developed REST APIs in Python and Ruby on Rails supporting mobile applications with 100,000 concurrent users

Implemented continuous integration and deployment pipeline using Jenkins, reducing release cycle from 2 weeks to 2 days

Contributed to open source projects and maintained internal code libraries used across 20-person engineering team

EDUCATION

Bachelor of Science in Computer Science

University College Dublin

Dublin, Ireland

Graduated: June 2012
