PROFESSIONAL SUMMARY

Full Stack Engineer with 5 years of experience building web applications and APIs across startups and established tech companies. I've spent the last few years moving between frontend and backend work, getting comfortable with React, Node.js, and cloud infrastructure. I enjoy solving problems that sit across the entire stack rather than staying siloed in one area. Based in Manchester with experience working in both remote and office environments.

WORK EXPERIENCE

Senior Full Stack Engineer

TechVenture Labs, Manchester, United Kingdom

techventure-labs.io

January 2022 - Present

Designed and implemented a microservices architecture that reduced API response times by 40% and improved system scalability to handle 10x traffic growth. Led a team of 2 junior developers through the migration of a legacy monolithic application to a modern tech stack using Node.js and React. Mentored 3 engineers on best practices for testing, code review processes, and deployment pipelines using Docker and Kubernetes. Took ownership of the payment processing system integration with Stripe, ensuring PCI compliance and handling over £2 million in monthly transactions with zero security incidents.

Full Stack Developer

DataFlow Solutions Ltd, Manchester, United Kingdom

dataflow-solutions.co.uk

June 2020 - December 2021

Built and maintained 8 customer-facing web applications using React, Express, and PostgreSQL serving over 500 active users. Implemented automated testing using Jest and Cypress, increasing test coverage from 35% to 82% and reducing production bugs by 45%. Developed internal tools and dashboards for data visualization using D3.js and Plotly, enabling the analytics team to cut reporting time from 2 days to 2 hours. Collaborated with DevOps to establish CI/CD pipelines using GitHub Actions and AWS, reducing deployment time from 45 minutes to 8 minutes.

Junior Full Stack Developer

Bright Digital Agency, Manchester, United Kingdom

brightdigital.net

August 2019 - May 2020

Contributed to 12 client websites and web applications using HTML, CSS, JavaScript, and PHP, meeting all project deadlines within scope. Created responsive designs and implemented front-end features using vanilla JavaScript and later Vue.js, improving page load times by 30%. Assisted in database design and optimization for MySQL-based applications, learning SQL query optimization and database indexing. Supported deployment and maintenance of live applications, gaining exposure to FTP deployment, cPanel hosting, and basic server administration.

EDUCATION

BSc Computer Science

University of Manchester

Manchester, United Kingdom

Graduated June 2019

Grade: Upper Second Class Honours (2:1)

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, HTML, CSS, PHP

Frontend: React, Vue.js, CSS3, Bootstrap, Material-UI, responsive design

Backend: Node.js, Express, Python Django, RESTful APIs, microservices

Databases: PostgreSQL, MySQL, MongoDB, database design and optimization

Tools and Platforms: Docker, Kubernetes, AWS (EC2, S3, RDS), Git, Linux, GitHub Actions, Jenkins

Testing: Jest, Cypress, unit testing, integration testing

Other: Agile/Scrum, API design, authentication protocols, payment systems integration
