PROFESSIONAL SUMMARY

I'm a junior full stack engineer based in Berlin with a passion for building web applications from database to UI. I started coding during my studies and completed my first professional role working with React and Node.js at an early-stage startup. I enjoy solving practical problems and learning new technologies through hands-on project work. I'm looking to grow my skills in a collaborative environment where I can contribute meaningfully to production systems.

TECHNICAL SKILLS

Languages: JavaScript, Python, TypeScript, HTML, CSS

Frontend: React, Redux, Next.js, Material-UI, Tailwind CSS

Backend: Node.js, Express.js, Django, REST APIs

Databases: PostgreSQL, MongoDB, Firebase

Tools & Platforms: Git, Docker, AWS (EC2, S3), Linux, VS Code, Postman

Other: Git workflows, Agile methodologies, JIRA, testing with Jest

WORK EXPERIENCE

Junior Full Stack Developer

TechFlow Solutions

<https://techflow.io>

Berlin, Germany

August 2023 - Present

Developed and maintained React components for a SaaS dashboard serving 50+ clients, implementing features like data visualization and user authentication flows

Built REST APIs with Node.js and Express.js to handle file uploads and data processing, reducing backend response time by 30%

Migrated legacy MongoDB queries to PostgreSQL, improving database query performance and reducing infrastructure costs

Collaborated with 4-person team using Git and JIRA, reviewing pull requests and participating in daily standups to maintain code quality

Full Stack Developer Intern

Digital Agency Berlin

<https://dagencyberlin.net>

Berlin, Germany

January 2023 - July 2023

Created a customer management portal using React and Node.js from scratch, delivering features including user registration, login, and profile management

Wrote unit tests using Jest and React Testing Library, achieving 70% code coverage on critical features

Debugged and fixed production issues in both frontend and backend components, maintaining 99% uptime for client applications

Worked with designer and backend team to implement responsive design and API integrations across 3 client projects

Frontend Developer (Contract)

StartupXYZ GmbH

<https://startupxyz.co>

Berlin, Germany

May 2022 - December 2022

Built interactive UI components using React and TypeScript for an MVP mobile-first web application

Implemented state management using Redux to handle complex user interactions across 5 main pages

Integrated third-party payment API and Google Analytics to track user behavior and conversion metrics

Fixed responsive design issues and optimized frontend bundle size from 850KB to 320KB using code splitting

EDUCATION

Bachelor of Science in Computer Science

Technical University of Berlin (Technische Universität Berlin)

Berlin, Germany

Graduated: June 2022

GPA: 3.2/4.0

Relevant Coursework: Web Development, Data Structures, Algorithms, Database Systems, Software Engineering

PROJECTS & REPOSITORIES

Weather App Dashboard

<https://github.com/marcusweber92/weather-dashboard>

React application that fetches real-time weather data from OpenWeather API, displays forecasts, and saves favorite locations using localStorage

E-commerce Product Filter

<https://github.com/marcusweber92/ecommerce-filter>

Full stack project with Node.js backend and React frontend, implementing advanced product filtering with Elasticsearch-style search functionality

Blog Platform API

<https://github.com/marcusweber92/blog-platform-api>

RESTful API built with Express.js and PostgreSQL, supporting user authentication, blog post CRUD operations, and comment system

LANGUAGES

German - Native

English - Fluent (B2 level)

CERTIFICATIONS

AWS Certified Cloud Practitioner (2023)
