PROFESSIONAL SUMMARY

Experienced Full Stack Engineer with 10 years building scalable web applications and leading technical initiatives across startups and established tech companies. I've spent the last five years focused on distributed systems and microservices architecture, working with teams to ship products that handle millions of requests daily. I enjoy mentoring junior developers and taking on challenging backend problems while keeping frontend user experience at the forefront of design decisions.

WORK EXPERIENCE

Senior Full Stack Engineer

TechVelocity Solutions

www.techvelocity.io

Bristol, United Kingdom

March 2021 - Present

Led the migration of a monolithic Node.js application to microservices architecture serving 500,000+ monthly active users, reducing API response times by 65 percent.

Designed and implemented a real-time notification system using Kafka and WebSockets, handling 50,000 concurrent connections with 99.95 percent uptime.

Mentored a team of four junior engineers on best practices in testing, code review, and performance optimization across both backend and frontend.

Established CI/CD pipelines using Docker and Kubernetes, reducing deployment time from 45 minutes to 8 minutes and enabling daily releases.

Full Stack Engineer

DataFlow Analytics Ltd

www.dataflowanalytics.co.uk

London, United Kingdom

June 2017 - February 2021

Built and maintained a React-based dashboard for financial data visualization processing over 2 terabytes of daily analytics with PostgreSQL and Python backends.

Implemented comprehensive unit and integration tests achieving 82 percent code coverage, which caught 70 percent of production issues before release.

Optimized database queries and caching strategies using Redis, improving page load times from 4.2 seconds to 1.1 seconds for data-heavy operations.

Collaborated with product managers and designers to translate business requirements into technical specifications and shipped twelve major features over three years.

Full Stack Developer

Digital Craft Ltd

www.digitalcraft.net

Bristol, United Kingdom

September 2014 - May 2017

Developed and shipped five client-facing web applications using Vue.js and Express.js, managing projects from conception through production deployment and maintenance.

Implemented JWT-based authentication and role-based access control systems across multiple applications, ensuring compliance with GDPR requirements.

Built automated testing suites using Jest and Mocha, increasing deployment confidence and reducing critical bugs by 55 percent in the first year.

Worked directly with clients to gather requirements, provide technical estimates, and deliver projects on time and within scope.

EDUCATION

Bachelor of Science in Computer Science

University of Bristol

Bristol, United Kingdom

Graduated June 2014

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML, CSS

Frontend: React, Vue.js, Redux, Next.js, Tailwind CSS, Material-UI

Backend: Node.js, Express.js, Django, REST APIs, GraphQL

Databases: PostgreSQL, MongoDB, Redis, Elasticsearch

DevOps: Docker, Kubernetes, AWS, Git, Jenkins, GitHub Actions

Architecture: Microservices, Event-Driven Systems, CQRS, Design Patterns

Testing: Jest, Mocha, Pytest, Cypress, React Testing Library

Other: Kafka, RabbitMQ, Linux, Agile, Technical Documentation
