PROFESSIONAL SUMMARY

Frontend engineer with 7 years of experience building user-centric web applications in fast-paced startup and scale-up environments. I've spent the last few years leading frontend teams, mentoring junior developers, and architecting component systems that serve millions of users. My focus has always been on balancing aesthetic design with robust performance and accessibility standards. I enjoy solving complex state management problems and breaking down ambiguous product requirements into clean, maintainable code.

WORK EXPERIENCE

Senior Frontend Engineer

SyntaxFlow

Paris, France

syntaxflow.io

March 2022 - Present

Architected and implemented a component library serving 15+ internal product teams, reducing development time by 40% and ensuring design consistency across all consumer-facing applications.

Led migration of legacy Angular application to React and TypeScript, improving code maintainability and reducing bundle size by 35% through modern tooling and tree-shaking optimization.

Mentored 4 junior frontend developers through code reviews, pair programming sessions, and technical documentation, with 2 advancing to mid-level roles within 18 months.

Established frontend testing standards including unit, integration, and visual regression testing, increasing test coverage from 45% to 82% while maintaining deployment velocity.

Frontend Engineer

TechVenture Solutions

Lyon, France

techventure.net

July 2019 - February 2022

Developed and maintained 5 customer-facing React applications serving 500,000+ monthly active users, implementing responsive design patterns and optimizing Core Web Vitals to improve conversion rates by 18%.

Reduced initial page load time from 4.2s to 1.8s by implementing code splitting, lazy loading, and aggressive CSS optimization strategies.

Collaborated with product and design teams to translate UI/UX specifications into pixel-perfect implementations while advocating for technical feasibility and performance constraints.

Owned frontend infrastructure improvements including CI/CD pipeline optimization and transition to monorepo architecture, reducing build times by 50%.

Junior Frontend Developer

CreativeWeb Agency

Paris, France

creativeweb.co

June 2017 - June 2019

Built responsive websites and web applications using vanilla JavaScript and jQuery for diverse clients ranging from e-commerce startups to established luxury brands.

Implemented cross-browser compatibility fixes and mobile-first responsive designs, ensuring consistent user experience across all devices and browsers.

Participated in daily standups and sprint planning while contributing to frontend code reviews and documentation efforts.

Learned modern JavaScript frameworks through self-directed study and company training programs, eventually transitioning the agency's new projects to Vue.js.

EDUCATION

Master's Degree in Computer Science

Université Paris-Saclay

Gif-sur-Yvette, France

Graduated: June 2017

Bachelor's Degree in Information Technology

Université Pierre et Marie Curie

Paris, France

Graduated: June 2015

TECHNICAL SKILLS

JavaScript ES6+, TypeScript, React, Vue.js, Next.js, HTML5, CSS3, SASS, Webpack, Vite, Redux, React Query, Jest, React Testing Library, Cypress, Figma, Git, Docker, AWS S3, Responsive Design, Web Accessibility (WCAG), SEO Optimization, Performance Optimization, REST APIs, GraphQL
